Class
AD

ISIN

The management company is
Santander Asset Management
Luxembourg S.A.

Objectives and Investment Policy

Objective: The objective of the Sub-Fund (denominated in EUR) is to maximise medium to long term returns.

Investment policy: This Sub-Fund invests in a diversified portfolio of equity securities of European issuers quoted or traded on European official stock exchanges or Regulated Markets.

This Sub-Fund invests mainly in equity securities of issuers in developed European countries (most of which will pay dividends on those securities) and up to 5% of its net assets in equity securities of issuers in Eastern European countries and Turkey.

Other investments may also include convertible bonds, warrants or derivative instruments.

In case of adverse market conditions this Sub-Fund may temporarily be invested in cash and money market instruments.

The Sub-Fund will continuously invest at least 51% of its net assets directly or indirectly via funds in equity assets, excluding depository receipts and financial derivatives. In the case of indirect investments, the Sub-Fund will take into account the effective equity ratio of the underlying fund.

The Sub-Fund may use derivatives with a view to reduce the risk of investment positions or for efficient portfolio management or as a part of the investment strategy.

During adverse equity market conditions, the Sub-Fund may temporarily invest up to 49% in cash and money market instruments in order to protect investors.

The Sub-Fund is actively managed in reference to the STOXX Europe Large 200 Net Return EUR (the "Benchmark"). The Sub-Fund does not track the Benchmark. The reason for referring to the Benchmark in this investment policy is to indicate that it is used for performance comparison purposes. However, the Investment Manager uses its discretion to select holdings based on an analysis of market conditions and an analysis of a company's prospects and

valuations. As such, the Investment Manager will not hold all of the Benchmark constituents.

SFDR Classification: The Sub-Fund promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR").

Net asset value calculation frequency: Daily, any full Business day.

Subscription, conversion and redemption applications lodged with the Registrar and Transfer Agent in Luxembourg on any Dealing Day (whereas a "Dealing Day" is any full Business Day preceding a Valuation Day) before 16:00 Luxembourg time (the "cut off time"), will be processed on that Dealing Day, using the net asset value per Share determined on the next Valuation Day for the relevant Class.

This is a EUR distribution share class. Unless specifically decided by the Board of Directors, the dividends will be paid to shareholders.

Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw the money within 3 years.

Risk and Reward Profile

The number indicated above is the fund's **Synthetic Risk Reward Indicator**, a way of illustrating the risk and reward profile of a fund by using historic performance data. Please be aware, this value can change over time and it may not be a reliable indication of the fund's future risk profile. In addition, the lowest category does not mean a risk-free investment.

A ranking of **6** means this fund typically has a high level of volatility, meaning that the fund's value could potentially fluctuate dramatically over a short period of time in either direction.

Investors should be aware of the following risks:

Derivatives Risk: The fund is permitted to use derivative instruments. The value of derivatives can be volatile and may result in gains or losses in excess of the amount required initially to establish a position.

Market Risk: Investments in the fund are subject to market fluctuations that could cause the value of a particular investment to change in a way that is detrimental to the fund's value.

Emerging Markets Risk: The fund is permitted to hold some exposure to Emerging Markets, which can at times carry a higher degree of risk compared to similar securities in more developed markets due to political and economic events.

Operational Risk: The risk of failures or delays in the system, processes and controls of the fund or those of its service providers that could lead to fund losses.

Sustainability risk: The Sub-Fund's investments may be subject to sustainability risks. Sustainability risks are environmental, social or governance events or conditions that, if they occur, could cause an actual or a potential material negative impact on the value of the Sub-Fund's investments.

Currency Risk: Investing in assets denominated in a currency other than that of the investor's own currency exposes the value of the investment to exchange rate fluctuations.
