Information to the Shareholders

The Annual General Meeting of Shareholders of SANTANDER SICAV (the "SICAV") is held at the registered office of the SICAV or at such other place in Luxembourg the last calendar day of the month of April in each year at 3.00 p.m. or if any such day is not a bank business day in Luxembourg, on the next following bank business day in Luxembourg.

Notices of all general meetings are sent to each registered Shareholders by post at least eight days prior to the meeting at their addresses in the register of Shareholders. Such notices will include the agenda and specify the time and place of the meeting and the conditions of admission and will refer to the requirements of Luxembourg law with regard to the necessary quorum and majorities required for the meeting.

Annual reports including audited financial statements are published within four months after the financial year-end and unaudited semi-annual reports are published within two months after the end of the relevant year. Such reports are made available at the registered office of the SICAV during normal business hours and on the following website: www.santanderassetmanagement.lu.

The financial year-end of the SICAV is December 31 of each year.

Information regarding the net asset value (the "NAV"), the offer and redemption prices is available at the registered office of the SICAV and on the following website: www.santanderassetmanagement.lu.

Under current legislation and practice, registered Shareholders are not subject to any capital gains, income, withholding, gift, inheritance or other taxes in Luxembourg (except for Shareholders domiciled, resident or having a permanent establishment in Luxembourg).

Investors should consult their professional advisers on the possible tax or other consequences of buying, holding, converting, transferring or selling any of the shares under the laws of their countries of citizenship, residence or domicile.

Investment Managers' report

SANTANDER ASSET MANAGEMENT

The second half of the year ended with rises in the main stock market indices, in the Eurozone (EG00) and US (G0Q0) government bond indices and in the Eurozone (ERL0 and HE00) and US (C0A0 and HUC0) IG and HY credit indices.

The US economy showed greater resilience than expected in the second part of the year. GDP surprised on the upside in 3Q23 by posting annualized growth of 5.2% and the Atlanta Fed's indicator, which estimates quarterly GDP based on published data, suggests that in 4Q the economy would have grown at a rate of over 2%.

In the Euro Zone, however, the economy contracted slightly in the third quarter of the year, by -0.1%, and the leading indicators that have been published suggest that 4Q23 GDP could again be in slightly negative territory. Inflation continued to moderate towards the central banks' target, although it still remained at high levels. In November in the US, prices rose by 3.1% and core inflation stood at 4%, while in the Euro Zone, headline inflation was 2.4% and core inflation stood at 3.6%.

In this context, all indications are that the Central Banks have ended the interest rate hike cycle. In the US, the Fed raised official rates +25bp. at the July meeting and since then held rates steady at 5.25%-5.50% at the September, November and December meetings. In the December update of its internal forecasts for the interest rate path, the Fed increased the expected rate cuts to three in 2024. Therefore, according to these forecasts, the US policy rate would fall by -75bp in 2024 to 4.50%-4.75%. This Fed forecast was supported by its more positive view of inflation, with core inflation expected to be 2.4% in 2024 and 2.2% in 2025. In the Eurozone, the ECB raised policy rates +25bp. at its July and September meetings (bringing the Deposit rate to 4%) and held them steady at its October and December meetings.

In the update of macroeconomic forecasts at the December meeting, the ECB put average core inflation at 2.7% for 2024 and Lagarde maintained a cautious tone at the press conference.

In the markets, performance was mixed in the first half of the year. In the fixed-income markets, sales prevailed strongly until November and the IRRs of the long maturities of the curves reached the highest levels in recent years; specifically in the US, the IRR of the 10-year Treasury promptly reached 5%. The positive reading of the October inflation data in the US, together with the Fed's decision to pause at the November meeting, caused the movement to reverse. Since the beginning of November, IRRs fell sharply across all sections of the curves in both the US and the Eurozone. During the second half of the year, in the US, the 2-year government bond yield fell -65bp while the 10-year government bond yield rose +4bp. In the Euro Zone, the 2-year German government bond IRR fell -79bp and the 10-year fell -37bp. In the credit market, performance was also positive in the period with falling IRRs and narrowing spreads on IG and HY in both the US and Eurozone.

In the second half of the year, the JPMorgan index for 1-3 year bonds rose +2.82% while the 7-10 year index rose +5.23%. On the credit side, the Iboxx Euro Corporates was up +5.90%. Emerging markets performance (as measured by the JPMorgan EMBI Diversified index) was +6.73% for the period.

The fall in government bond prices, and rise in their IRRs, was met with selling on the European and US stock exchanges during the period from August to October. However, the downward movement in IRRs since the beginning of November also directed flows to the stock markets, where buying prevailed. The main indexes closed December at annual highs. Over the six-month period, the EUROSTOXX50 rose by +2.79%, the German DAX by +3.74%, the IBEX35 by +5.31% and the British FTSE100 by +2.68%. In the United States, the SP500 rose +7.18% and the Nasdaq +8.87%. In Japan, the Nikkei 225 was up +0.83%. As for Latin American emerging markets (measured in local currency), the MSCI Latin America rose +9.55% in the first half of the year.

In terms of currencies, during the second half of the year, the euro appreciated +1.19% against the dollar and +0.89% against the pound sterling.

For 2024, the trajectory of inflation will be key and will determine the actions of the Central Banks, for which investors expect them to start lowering rates during the year. Investors will also be watching the impact on economic growth that may result from the tightening of credit conditions triggered by the official rate hike.

MORGAN STANLEY

For the period, the portfolio returned 44.95% (gross of fees), the S&P 500 returned 26.29%, and the Lipper Large Cap Growth peer group returned 42.03%. Counterpoint Global seeks high quality companies, which we define primarily as those with sustainable competitive advantages. We manage concentrated portfolios that are highly differentiated from the benchmark, with securities weighted on our assessment of the quality of the company and our conviction. The value added or detracted in any period of time will typically result from stock selection, given our philosophy and process.

Investment Managers' report (continued)

The long-term investment horizon and conviction weighted, highly active investment approach embraced by Counterpoint Global can result in periods of performance deviation from the benchmark and peers. The portfolio outperformed the S&P 500 index over the period under review, due to favourable sector allocations and strong stock selection.

Counterpoint Global looks to own a portfolio of unique companies with diverse business drivers, strong competitive advantages and positioning, and healthy secular growth prospects whose market value we believe can increase significantly over the long-term for underlying fundamental reasons, independent of the macro or market environment. We find these companies through fundamental research. Our emphasis is on secular growth, and as a result short-term market events are not as meaningful in the stock selection process.

Counterpoint Global believes having a market outlook can be an anchor. We focus on assessing company prospects over a five year investment horizon. Current portfolio positioning reflects what we believe are the best long-term investment opportunities.

PIMCO

We got off to a strong start early in the year. Despite recessionary fears and the uncertainty caused by the collapse of Silicon Valley Bank and Credit Suisse in March, markets quickly shrugged off contagion risks and closed Q1 with robust performance across bonds and equities. Then, for Q2, came a new reason to cheer: the wave of excitement around Artificial Intelligence. With it, market participants placed huge bets on AI, citing its potential to boost productivity and unlock new business models. Equities rallied indiscriminately as a result, particularly tech software and chip stocks, and we saw the likes of Nvidia rocketing 30% in less than a week (the share price more than tripled over the year).

But good times cannot last forever. Towards the end of summer, all this excitement led central banks to issue stark reminders that it was still too early to engage the turbo. This was in fact a signal that had been flashing red in bond markets throughout most of Q2 as yields had crept higher and higher, giving rise to a clear dichotomy between bond and equity markets. Finally though, in August, equity markets took stock (pun intended) of mixed economic data, a hawkish Jackson Hole, and negative news from China. Equities went into reverse, breaking a 7-month winning streak and unwinding some of that rift that had built up between equities and bonds.

The pain lasted several months as investors internalised that rates were staying higher for longer, and it was exacerbated in early October by geopolitical risks from escalating conflict in the Middle East. Amid heightened uncertainty in the region, markets assessed the risks of wider contagion (including the ongoing events in the Red Sea) and the potential spill over effects into commodity markets. By the end of October, there had been 3 months of consecutive negative performance for equities and 7 months of consecutive negative performance for bonds.

Fortunately, it didn't take much to bring the bulls back. November ushered in an early Santa Claus rally, with bonds and equities roaring as lower inflation and energy prices renewed hopes of a soft landing. After touching 5% in October, the 10Y Treasury rallied 60bps in one month and global bonds had their best monthly performance since the 1980s – the Global Agg index was up almost 4% for the month! Similar story in equities, as the previous 3 months were quickly in the rear-view mirror and both the S&P500 and MSCI World indices rose 9% in a single month.

Zooming in on December, that positive trend continued as a result of encouraging inflation data and a perceived dovish pivot by the Fed – which included a new dot-plot showing 3 rate cuts of 25bps for 2024. On the former, inflation prints came in lower across major economies. In the US, a PCE reading (the Fed's preferred gauge) of 2.6% was 0.3% lower than the previous month and 0.2% below consensus. Similarly, in Germany, inflation surprised lower as 3.2% was less than the 3.5% expected and below the previous month's 3.8%. Finally, there was another significant surprise in the UK, where inflation slowed to 3.9% versus the consensus of 4.4%, thereby trending much lower compared to the previous month's 4.6%.

AMUNDI

Overall, the Portfolio delivered a negative return for the full year 2023, with negative performance in our hedges and directional Macro positions more than offsetting positive contributions from our relative value positions.

Indeed, performance started well in January: increased optimism that markets were pricing the peak in rate rises in the US, lower-than-expected inflation prints, along with confirmation that China was abandoning its zero-Covid policy saw our long Non-EUR Duration position lead the way in performance terms but also our exposure to global equity and corporate credit did well. Then from February onward performance deteriorated: increased worries that strong-than-expected inflation along with better economic growth would mean higher terminal rates spooked investors and with yields rising and equity falling our directional position detracted.

Investment Managers' report (continued)

In March concerns about global financial stability on the back of the collapse of SVB and the rushed takeover of Credit Suisse by UBS affected markets. Whilst our hedges and macro position delivered positive performance the high level of volatility affected our relative value positions (particularly in the equity space) which more than offset those positive contributions.

With the impact of the banking crisis potentially propagating across all asset classes our focus shifted back to capital protection, so we decided to take a cautious approach increasing exposure to safe assets (government bonds) and keeping relatively low level of equity.

From the beginning of the second quarter through October our cautious positioning largely contributed to the portfolio underperformance: despite the dynamic management of our exposure, high level of duration together with small equity exposure drove the portfolio to lag as equity delivered positive performance and yield curves moved upward. The largest detractors in this phase were our macro directional positions particularly the duration. In the relative space we had mixed fortunes with loss on equity and interest rate relative positions more than offsetting the positive return of our spread positions; our hedges protected performance but overall, the portfolio delivered negative return.

In November, the market narrative began to turn driven by some downside surprises for inflation. With inflation moving towards the US Federal Reserve target levels without a recession taking place, central bankers began to sound more dovish. This led to significant optimism and a broad rally both for fixed income and equities. Our cautious and tactically approach with high duration and positive convexity - call exposure - to participate to potentially year-end rally proved right and allowed the portfolio to recover large part of the loss so far accumulated.

All in all, in 2023, our Non-Eur duration positions (long US government), our long US dollar exposure (although reduced during the year) and our equity hedges were the largest detractors whilst on the positive side the largest contribution came from our US and European equity exposure and from our corporate credit exposure. In broad terms, both our macro directional positions and hedges underperformed whilst the alpha contribution coming from our relative value positions and our corporate name selection delivered positive return.

RBC

The Fund's performance in 2023 was aided by corporate-bond selection, especially in the energy, banking and automotive industries. Jaguar Land Rover, an automaker, was a significant outperformer in the Fund, benefiting from easing supply-chain bottlenecks and lower-than-anticipated gasoline prices. Among banks, Monte dei Paschi rallied during the year, driven by a recognition that the Italian issuer's balance sheet had strengthened. The Fund's largest underperformers by far were positions in the Chinese real estate issuer Country Garden and the financial-services issuer Credit Suisse.

The Fund's individual holdings across rating categories had a positive impact on returns, partially offset by the allocation to BB-rated and CCC & below rated issuers. From a regional perspective, returns were bolstered by specific holdings of North American issuers.

The Fund's duration positioning detracted from performance, mainly due to positioning on the USD curve.

ROBECO

In 2023 equity markets showed remarkable resilience and defied gloomy expectations. Many major indices recorded double-digit gains with MSCI World delivering eye-catching returns of 23.8% (USD). Given the record pace of Central Bank tightening and the ongoing battle against inflation many were predicting weak earnings and some form of recession. Throw in a regional banking crisis and geopolitics continually casting a shadow over equity markets and the negative sentiment seemed justified.

However, one notable feature of developed equity markets was the Tech AI revolution which played a pivotal role in driving market gains. Throughout 2023 we continued to see an extraordinarily strong environment for names linked with the AI theme contributing to the robust performance of major technology indices. The equity rally was impressive but lopsided led by the "Magnificent Seven" with Nvidia appreciating over 200%. In addition, weight-loss drugs caught the attention of the market and dominated earnings calls as investors analyzed its impact and potential.

The final months of 2023 brought strong returns too with a strong end-of-year rally and a long-awaited broadening of the market. Markets rallied strongly as inflation numbers continued to come down in both the US and Europe and the US Federal Reserve indicated that it is done raising short term interest rates. While the Fed has not indicated that it will start cutting rates anytime soon, the market is now clearly anticipating that it will start to cut rates somewhere at the end of the first quarter or in the second quarter of 2024. This led to strong returns in interest rate sensitive names in both Financials and Real Estate, as well as in more cyclical names that would benefit from lower rates overall.

Investment Managers' report (continued)

The largest contributions to performance for the full year of 2023 came from Meta Platforms and Alphabet in Communication Services. These stocks performed strongly on a rebound in digital advertisement revenues during the year. These names also benefited from the excitement regarding the Artificial Intelligence theme, which was one of the most important drivers of stock performance during 2023. On the healthcare side, we benefited from our position in Eli Lilly, which performed very strongly on the back of strong results from new so-called GLP-1 medicine that showed positive preliminary results in treating Obese- and Diabetes patients. We also benefited from impressive performance in the semiconductor sector through Nvidia and AMD, which had robust performance due to the demand for chips that power AI systems.

On the negative side, we suffered from a correction in some of our Healthcare names that had been market darlings in 2022. Both UnitedHealth and Thermo Fisher contracted in 2023, due to the post-Covid pricing normalization. We also suffered from a weak year from Neste Oyj in Energy that suffered from weak pricing for alternative energy solutions during 2023, as well as a delay in the opening of its Singapore facility. Also, for the full year, we did have negative attribution from our position in Bank of America, as well as from a weak performance from Alibaba in Consumer Discretionary.

Despite the note of caution mentioned above, we are quite constructive, because we believe we are at peak interest rates and rates will start to decline by quite a large amount. Maybe not in the next six months, but over the next two to three years. We'll see normalization and at some point, must fight deflation again. So, we do see rates coming back from 5% in the US to 3% over the next two years. That makes a lot of difference for equities. Second, even though sell side expectations are for 10% to 13% earnings growth, few people on the buy side believe that. Many on the buy side expect 10% earnings decline next year. If we only have a shallow recession, or no recession at all in the US, because the consumer is in decent shape, we have okay markets. Lower rates with many participants overestimating earnings risk could be a good combination. A lot is riding on the AI theme. The next two years will be the proof in the pudding. The companies that are best positioned should distance themselves from the crowd in terms of results. That will be key. Either it will prove to be a relative fad and enterprises are not willing to pay for it, or it proves a key differentiator. And then there will be even more separation between the AI winners and losers. We position ourselves for the AI winner camp.

JP MORGAN

2023 was a year filled with many twists and turns. Yet, through it all, the U.S. economy remained resilient, posting three quarters of positive GDP growth despite facing aggressive monetary tightening by the Federal Reserve (Fed), heightened geopolitical risks and a regional banking crisis. Data released in December pointed to the continued possibility of the Fed engineering a soft landing while making progress in achieving its goal of 2% inflation.

Inflation continued to trend downward with headline CPI rising 0.1% month-over-month (m/m) and 3.1% year-over-year (y/y) in November, slightly above consensus but down from October, while core CPI rose 0.3% m/m and 4.0% y/y. The Fed's preferred measure of inflation, the Personal Consumption Expenditures Price Index (PCE), was softer than expected. Headline PCE fell 0.1% m/m, bringing the year ago level down from 2.9% in October to 2.6% in November. With expectations for a further slowdown in rent inflation in the coming months, this reading provides further evidence that price growth is softening.

Cooling inflation was also met with strong labor market data as the U.S. labor market continued to demonstrate improved demand/supply balance. The demand for labor, as measured by the Job Openings and Labor Turnover Survey (JOLTS) report, showed openings falling 6.6% to 8.73 million, the lowest level since 2021, but still slightly above pre-pandemic norms. The job openings to unemployed ratio is now at 1.3x, near pre-pandemic levels.

The November Jobs report showed healthy employment gains but provided further evidence that the labor market is moderating. Nonfarm payrolls rose by 199,000, beating expectations of 180,000 but were below the 2023 average of 233,000. The unemployment rate declined to 3.7% from 3.9% the prior month, as new workers joined the labor force, but has moved up from its 50-year low of 3.4% earlier in the year. Average hourly earnings came in slightly above expectations, rising 0.4% m/m, with the year ago level unchanged at 4.0%.

At its final meeting of the year, the Federal Open Market Committee (FOMC) delivered an early holiday gift with a dovish shift in policy expectations, leaving the federal funds rate target range unchanged at 5.25%-5.50%, while strongly hinting that rates are at their cycle peak and the next move will be a rate cut. The median FOMC member now expects three rate cuts next year to 4.6%, an extra cut compared to the dot plot in September's Summary of Economic Projections (SEP). Moreover, updates to the SEP showed lower inflation forecasts for 2023, 2024 and 2025 without material revisions to the growth or employment forecasts, suggesting that the Fed is forecasting a soft landing. In the press conference, Chair Powell did not push back on dovish market pricing and said the Fed had started to discuss cuts at this meeting.

Markets interpreted the December FOMC meeting as a pivot in policy and began to price in more aggressive rate cuts for 2024. Consequently, Treasury yields rallied across the curve in December and with longer maturities declining more. The three-month Treasury bill yield declined 5 basis points (bps) on the month to 5.34%, while one-year T-bill and two-year Treasury yields fell 35 bps and 43 bps to end the year at 4.77% and 4.25%, respectively.

The figures stated in this report are historical and not necessarily indicative of future performance.

Investment Managers' report (continued)

The inception date of the Fund was 3rd April 2019. The cumulative gross performance of the fund inception to date (as at 31/12/2023) was 8.85% vs. 8.18% for the benchmark (ICE BofA 3-Month US Treasury Bill Index). In the reporting period (i.e. full year 2023), the total gross return of the fund was 4.96% vs 5.02% for the benchmark, with a total gross underperformance of -0.06%.

SCHROEDER

Asian equities continue to offer investors the opportunity to invest in one of the fastest growing regions in the world.

Home to more than 50% of the world's population, Asia's economies offer significant growth potential, driven by factors including a rising middle class, urbanization, and advancements in technology.

Asia is projected to continue experiencing strong economic growth, driven by factors such as domestic consumption, infrastructure investment, and investment into technology.

Urbanization in Asia, which remains low relative to more developed markets, is also expected to continue, driving demand for infrastructure development, such as transportation networks, energy facilities, and smart cities. Investments in construction, machinery, and infrastructure-related sectors can benefit from this trend.

The region's large population and emerging middle class are driving robust demand for goods and services. For example, markets like India and the Philippines continue to enjoy the benefits of a young and growing workforce, which can contribute to productivity gains and innovation. The growing middle class drives consumption and consumer demand, benefiting areas such as banking, retail, healthcare, and entertainment.

China continues to be the dominant economy in the region, with Hong Kong its gateway. Despite more recent concerns about a slowdown in economic growth, as the second largest economy in the world, opportunities in its domestic market remain plentiful, particularly across consumer related sectors. At the same time, China remains a key manufacturing center for the world given its well-developed infrastructure and a highly skilled workforce. Given its ageing population, however, automation of these manufacturing facilities is likely to be a key thematic looking ahead.

More mature markets like Korea and Taiwan are leading the way in technology, in areas such as consumer electronics in the case of Korea, and semiconductor chip production in Taiwan. Continued advancements in areas including software development, digital services and AI are likely to drive growth in Asian tech companies and related sectors.

Looking at global trends, Asia is also increasingly focusing on sustainable development and addressing environmental challenges. Investments in renewable energy, clean technologies, and sustainable practices can capitalize on this shift, as governments and businesses around Asia start to prioritize environmental sustainability.

Investment opportunities and themes within Asia remain plentiful, but these opportunities are not without risks, including changes in regulation and varied corporate governance amongst businesses. To manage this risk, it is important to have people on the ground who can navigate this dynamic economic landscape.

At Schroders, we have over 50 investment professionals on the ground in Asia covering the Asian markets. We focus on detailed company analysis and take a bottom-up approach to building our portfolio, focusing on companies that grow shareholder value over the long term.

We have learned that just buying into a fast-growing market does not necessarily translate into strong investment returns.

It's important to focus on the companies, and that's what we do.

Our team of investment professionals conduct company level research to help support the work of our fund manager, [Louisa Lo], who has over 30 years of experience investing in the region.

We believe that the most consistent way outperforms the market is to buy high quality companies and businesses at attractive prices. This is how we build our portfolio and how we deliver consistent results for our clients.

The Santander GO Asia fund provides investors with an opportunity to gain exposure to some of the best companies in the Asia region that we believe can capitalize on the tailwinds provided by the structural growth trends available in the region.

Luxembourg, January 31, 2024

The Investment Managers of the SICAV

SANTANDER SICAV

Combined statement of net assets as at December 31, 2023

	Notes	COMBINED EUR

NOTE 1 - GENERAL

SANTANDER SICAV (the "SICAV") is a Luxembourg incorporated investment company (Société d'Investissement à Capital Variable) which was set up for an unlimited duration in Luxembourg in the form of a "société anonyme" on October 27, 1993, in accordance with the provisions of the amended Law of March 30, 1988 on undertakings for collective investment and the amended Law of August 10, 1915 on commercial companies. Since 2011, the SICAV is subject to the provisions of part I of the Law of December 17, 2010 (the "Law of 2010"), relating to Undertakings of Collective Investment in Transferable Securities, as amended.

Its Articles of Incorporation were published in the "Mémorial C, Recueil des Sociétés et Associations" (the "Mémorial") on November 27, 1993. They have been amended for the last time on September 8, 2021 and the changes have been published in the "Recueil Electronique des Sociétés et Associations" (RESA), (RESA_2021_203) on September 23, 2021.

The Board of Directors of the SICAV has appointed Santander Asset Management Luxembourg S.A. as Management Company of the SICAV within the meaning of Chapter 15 of the Law of 2010. Santander Asset Management Luxembourg S.A. was incorporated on November 29, 1996 as a corporation (société anonyme) under the laws of Luxembourg for an unlimited duration. It has its registered office at 43, Avenue John F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg. Its Articles of Incorporation were initially published in the Mémorial on January 13, 1997 and were last amended on 24 January 2019.

The SICAV is registered on the Register of Commerce and Companies of Luxembourg under number B 45 337. The SICAV's financial year ends on December 31 of each year.

The SICAV aims to provide investors with a choice of Sub-Funds, invested in the principal types of securities, equities and bonds of the world encompassing the strategies of capital conservation and growth and in accordance with the principle of risk-spreading.

On February 3, 2023, the Board of Directors of the SICAV resolved to launch the Sub-Fund SANTANDER TARGET MATURITY 2026 EURO with effective date as of March 21, 2023.

On February 3, 2023, the Board of Directors of the SICAV resolved to launch the Sub-Fund SANTANDER TARGET MATURITY 2026 DOLLAR with effective date as of March 28, 2023.

On May 23, 2023, the Board of Directors of the SICAV resolved to launch the Sub-Fund SANTANDER GO ASIAN EQUITY with effective date as of June 27, 2023.

On May 23, 2023, the Board of Directors of the SICAV resolved to launch the Sub-Fund SANTANDER US EQUITY ESG with effective date as of July 6, 2023.

On August 23, 2023, the Board of Directors of the SICAV resolved to launch the Sub-Fund SANTANDER TARGET MATURITY 2025 EURO with effective date as of November 7, 2023.

On October 4, 2023, the Board of Directors of the SICAV resolved to launch the Sub-Fund SANTANDER GLOBAL VOLATILITY with effective date as of December 14, 2023.

Pursuant to the Articles of Incorporation of the SICAV, the Board of Directors of the SICAV may decide to issue, within each Sub-Fund, separate classes of shares (hereinafter referred to as a "Class" or "Classes" as appropriate). The Classes of Shares currently issued by the SICAV (Class A, Class AD, Class AE, Class AEH, Class B, Class BD, Class BE, Class BEH, Class CDE, Class F, Class I, Class IE, Class IEH, Class M, Class MD, Class ME, Class MEH, Class SE, Class X and Class XE denominated in EUR, Class A, Class AD, Class AU, Class AUH, Class B, Class BUH, Class C, Class CD, Class D, Class I, Class ID, Class M, Class S, Class V and Class X denominated in USD, Class APH, Class IKP and Class RKP denominated in GBP) differ in sales and/or redemption charge structure, fee structure, investment management fee, currency, investment minimum, distribution policy, hedging policy, the investor targeted and the performance fee.

In addition to classes issued in the reference currency of the relevant Sub-Fund, classes may be available in the following currencies (currency abbreviation inserted in the relevant class name):

EURO (abbreviated E),
US Dollars (abbreviated U),
GBP (abbreviated P).

Notes to the financial statements as at December 31, 2023 (continued)

NOTE 1 - GENERAL (continued)

Unless otherwise provided in the Appendix of the prospectus relating to the relevant Sub-Fund:

Class A Shares may only be acquired by investors subscribing for a minimum amount of EUR 500, USD 500 or GBP 1,000 following the reference currency of the Sub-Fund.

Class AD Shares may only be acquired by investors subscribing for a minimum amount of EUR 500, USD 500 or GBP 1,000 following the reference currency of the Sub-Fund. This Class AD aims to pay dividends to the Shareholders owning such Class of Shares.

Class B Shares may only be acquired by investors subscribing for a minimum amount of EUR 25,000 or USD 25,000 following the reference currency of the Sub-Fund.

Class BD Shares may only be acquired by investors subscribing for a minimum amount of EUR 25,000 or USD 25,000 following the reference currency of the Sub-Fund. This Class BD aims to pay dividends to the Shareholders owning such Class of Shares.

Class C Shares may only be acquired by investors subscribing for a minimum amount of EUR 300,000 or USD 300,000 following the reference currency of the Sub-Fund.

Class CD Shares may only be acquired by investors subscribing for a minimum amount of EUR 300,000 or USD 300,000 following the reference currency of the Sub-Fund. This Class CD aims to pay dividends to the Shareholders owning such Class of Shares.

Class D Shares may only be acquired by investors subscribing for a minimum amount of GBP 25,000 or USD 25,000 following the reference currency of the Sub-Fund. This Class D aims to pay dividends to the Shareholders owning such Class of Shares.

Class F Shares may only be acquired by Institutional Investors within the meaning of article 174 of the amended Law of 2010, and subscriptions will be possible for limited periods determined by the Board of Directors. This Class is launched with the intention of reaching an optimal size to make the relevant Sub-Fund efficient in the interest of its Shareholders. No minimum subscription amount is applicable to this Class, unless otherwise determined by the Board of Directors.

Class I Shares may only be acquired by Institutional Investors within the meaning of article 174 of the amended Law of 2010 relating to undertakings for collective investment subscribing for a minimum amount of USD 500,000 or EUR 500,000 following the reference currency of the Sub-Fund.

Class ID Shares may only be acquired by Institutional Investors subscribing for a minimum amount of USD 500,000 or EUR 500,000 following the reference currency of the Sub-Fund. This Class ID aims to pay dividends to the Shareholders owning such Class of Shares.

Class IK Shares may only be acquired by Institutional Investor subscribing for a minimum amount of GBP 500,000 or EUR 500,000 following the reference currency of the Sub-Fund. The Board of Directors of the SICAV intends to obtain certification from the United Kingdom's HM Revenue & Customs that the SICAV be considered as a reporting offshore fund ("UK reporting status") for this Class.

Class M Shares may only be acquired by Institutional Investors qualifying as feeder funds and authorised by the Board of Directors of the SICAV. No minimum subscription amount is applicable to this share class. The subscription currency will be EUR or USD following the reference currency of the Sub-Fund.

Class MD Shares may only be acquired by Institutional Investors qualifying as feeder funds and authorised by the Board of Directors of the SICAV. No minimum subscription amount is applicable to this share class. The subscription currency will be EUR or USD following the reference currency of the Sub-Fund. Class MD Shares aim to pay dividends to the shareholders owning such class of shares.

Class RK Shares may only be acquired by investors subscribing for a minimum amount of GBP 500 following the reference currency of the Sub-Fund. The Board of Directors of the SICAV intends to obtain certification from the United Kingdom's HM Revenue & Customs that the SICAV be considered as a reporting offshore fund ("UK reporting status") for this Class.

Notes to the financial statements as at December 31, 2023 (continued)

NOTE 1 - GENERAL (continued)

Class S are reserved for providers of independent advisory services or discretionary investment management services, or other distributors who: (i) provide investment services and activities as defined by Directive 2014/65/EU on markets in financial instruments ("MiFID II"); and ii) have separate fee arrangements with their clients in relation to those services and activities provided; and (iii) do not receive any other fee, rebate or payment payable out of the relevant Sub-Fund's assets in relation to those services and activities.

Class V Shares may only be acquired by Institutional Investors qualifying as feeder funds established in Brazil and authorized by the Board of Directors. No minimum subscription amount is applicable to this Share Class. It seeks to systematically convert the value of its net assets to BRL via the use of derivatives including non-deliverable forwards. As BRL is a restricted currency, the Class V Shares cannot be denominated in BRL but instead will be denominated in the Reference Currency of the relevant Sub-Fund. Due to the use of currency derivatives, the NAV per Share will fluctuate in line with the fluctuations in exchange rates between the BRL and the Reference Currency of the Sub-Fund. The effects of this will be reflected in the performance of the Share Class which therefore may differ significantly from the performance of other Share Classes within the Sub-Fund. Any profit or loss as well as costs and expenses resulting from these transactions will be reflected exclusively in the NAV of this Share Class.

Class X Shares may only be acquired by Santander Asset Management Group entities and their affiliates at any time and authorized by the Board of Directors. No minimum subscription amount is applicable to this Share Class.

Where offered in a currency other than the relevant Sub-Fund's reference currency, the Share Class currency may be hedged to the reference currency. The Share Class will be designated as such by the insertion of the abbreviation H in the relevant Class name.

As at December 31, 2023, the shares of the following Sub-Funds were offered for issue and sale:

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The reporting currency of the SICAV is EUR.

The financial statements of the SICAV have been presented in conformity with legal and regulatory requirements in Luxembourg, applicable to Undertakings of Collective Investment in transferable securities and prepared in accordance with generally accepted accounting policies in Luxembourg. It includes the following significant accounting policies:

3.1 Valuation of assets

-each security and/or money market instrument which is quoted or dealt in on a stock exchange is valued at its latest available closing price, and where appropriate at the middle market price on the stock exchange which is normally the principal market for such security and/or money market instrument and each security and/or money market instrument dealt in on another regulated market is valued in a manner as near as possible to that for quoted securities.

-the value of securities and/or money market instruments not quoted or dealt in on a stock exchange or another regulated market and of securities and/or money market instruments which are so quoted or dealt in but in respect of which no price quotation is available or the price quoted is not representative of the securities' and/or money market instruments' fair market value are determined prudently and in good faith by the Board of Directors of the SICAV on the basis of their reasonably foreseeable sales prices

-shares or units in underlying open-ended investment funds are valued at their last available calculated NAV.

Cash and other liquid assets are valued at their face value with interest accrued.

3.2 Net realised gain/(loss) on sales of investments

Net realised result on sales of investments is determined on the basis of the average cost of investments sold and are presented in the Statement of operations and changes in net assets.

3.3 Foreign exchange translation

Combined statements of the SICAV

The various items of the combined Statement of net assets and the combined Statement of operations and changes in net assets of the SICAV as of December 31, 2023 are equal to the total sum of the corresponding items of the Statements of net assets and Statements of operations and changes in net assets of each Sub-Fund translated into EUR at the exchange rates ruling as of December 31, 2023.

Notes to the financial statements as at December 31, 2023 (continued)

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.3 Foreign exchange translation (continued)

Transactions in foreign currencies

Assets and liabilities expressed in currencies other than the respective Sub-Fund's currency are translated into the respective Sub-Fund's currency at the exchange rates prevailing as of December 31, 2023. Income and expenses in currencies other than the respective Sub-Fund's currency are translated into the respective Sub-Fund's currency at the exchange rates prevailing at the transaction date.

Net realised and change in net unrealised gain or loss on foreign exchange are recorded in the Statement of operations and changes in net assets under the heading "Foreign exchange".

Exchange rates used as of December 31, 2023:

1 EUR = 0.866528 GBP

1 EUR = 1.104650 USD

3.4 Valuation of forward foreign exchange contracts

Outstanding forward foreign exchange contracts are valued on the basis of forward exchange rates prevailing at the relevant valuation date and net realised and change in net unrealised appreciation or depreciation are included in the Statement of operations and changes in net assets.

3.5 Valuation of futures contracts

The futures contracts are valued on the basis of the last available price on the relevant market at the valuation date and net realised and change in net unrealised gain or loss are included in the Statement of operations and changes in net assets.

3.6 Valuation of options contracts

The settlement value of options traded on stock markets is based on the closing price published by the stock exchanges on which the Sub-Fund concluded the contracts. The settlement value of options that are not traded on a stock exchange is determined according to valuation rules established by the Board of Directors of the SICAV, according to uniform criteria for each type of contracts.

Net realised and change in net unrealised gain or loss are included in the Statement of operations and changes in net assets.

3.7 Valuation of interest rate swap contracts

An interest rate swap contract is a bilateral agreement in which each of the parties agree to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged.

Net realised and change in net unrealised gain or loss are included in the Statement of operations and changes in net assets.

3.8 Valuation of credit default swap contracts

A credit default swap contract is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic coupon for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset, occurs. If such an event occurs, the party will then make a payment to the first party, and the Swap will terminate. The value of the underlying securities shall be taken into account for the calculation of the investment and borrowing powers applicable to individual issuers.

Net realised and change in net unrealised gain or loss are included in the Statement of operations and changes in net assets.

Notes to the financial statements as at December 31, 2023 (continued)

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.9 Valuation of total return swaps

A total return swap is a bilateral agreement in which each party agrees to exchange payments based on the performance of an underlying instrument represented by a security, commodity, basket or index thereof for a fixed or variable rate. One party pays out the total return of a specific reference asset, and in return, receives a regular stream of payments. The total performance will include gains and losses on the underlying, as well as any interest or dividends during the contract period according to the type of underlying. The cash flows to be exchanged are calculated by reference to an agreed upon notional amount or quantity. To the extent the total return of the reference asset underlying the transaction exceeds or falls short of the offsetting payment, the SICAV receive a payment from or make a payment to the counterparty.

Net realised and change in net unrealised gain or loss are included in the Statement of operations and changes in net assets.

3.10 Reverse repurchase agreements

A reverse repurchase agreement is an agreement by which, in exchange for a sum, the SICAV receives (purchases) transferable securities from a counterparty which agrees to repurchase them at a price and a term specified between the two parties when the agreement is concluded. A reverse repurchase agreement is similar in its effects to a loan granted by the SICAV to the counterparty, the loan being secured by transferable securities. The SICAV accounts for the repurchase agreement as if it were a loan and shows it in the Statement of net assets under the heading "Receivable on reverse repurchase agreements / Payable on reverse repurchase agreements". A reverse repurchase agreement is generally only of short duration and is not transferable. The SICAV values this type of agreement at cost, which, when combined with accrued interest, provides an approximation of the value at which the securities will be repurchased by the counterparty.

3.11 Formation expenses

Formation expenses are amortised on a straight-line basis over a period of five years.

3.12 Income recognition

Dividends, net of any unrecoverable withholding taxes, are taken into income on the date upon which the relevant securities are first listed as "ex-dividend". Interest income is accrued on a daily basis.

3.13 Prepaid expenses

Prepaid expenses are listed within the Statement of Net Assets until the prepaid item is consumed. Once consumption has occurred, the prepaid expenses are removed from the Statement of Net Assets and are instead reported in that period as an expense on the income statement.

SANTANDER SICAV

Notes to the financial statements as at December 31, 2023 (continued)

NOTE 4 - COMMISSIONS ON ISSUE AND REDEMPTION

The SICAV's shares are issued at their NAV to which may be added a sales charge not exceeding 5%, paid to (if any), and retained by, the intermediary acting in relation to the distribution of shares, for:

NOTE 7 - DEPOSITARY AND ADMINISTRATION FEES

In its capacity as Depositary, Administrative, Corporate and Domiciliary Agent, J.P. MORGAN BANK SE. is entitled to receive as remuneration for the services rendered to the SICAV and the Management Company an annual fee depending on the nature of the investments of the different Sub-Funds in a range from 0.05% p.a. to 0.30% p.a. of the NAV of the assets of the different Sub-Funds. Such fee is calculated and accrued daily and is paid monthly in arrears to the Depositary by the SICAV. It should be noted that a minimum annual fee for administration services (EUR 12,000) and fiduciary services (EUR 8,000) is payable by the SICAV to J.P. MORGAN BANK SE. in remuneration of its fund accounting, valuation and fiduciary services in case the fees rates agreed for these services (expressed in basis points per annum) do not reach the annual minima. Administration and fiduciary fees (rate expressed in basis points with an annual minimum) are calculated and accrued in the Sub-Funds on daily basis and payable to the Depositary, Administrative, Corporate and Domiciliary Agent on a monthly basis.

NOTE 8 - ANNUAL TAX

Under current law and practice, the SICAV is not liable to any Luxembourg income tax, nor are dividends paid by the SICAV liable to any Luxembourg withholding tax. However, the SICAV is liable in Luxembourg to an annual tax (hereinafter the "Subscription Tax"), payable quarterly, of 0.05% p.a. of the net assets of all classes of shares at the end of the relevant quarter; except that the Subscription Tax rate will be reduced to 0.01% p.a. in respect of the net assets attributable to such Classes of Shares which are reserved for Institutional Investors. In any event, these net assets will exclude the proportion of net assets of the respective Class of shares as of the last day of the relevant quarter represented by units or shares held in other Luxembourg undertakings for collective investment, to the extent that such units or shares have already been subject to the Subscription tax provided for by amended Law of 2010 on undertakings for collective investment, for which no Subscription tax shall be levied. No stamp duty or other tax is payable in Luxembourg on the issue of shares of the SICAV except the one required by Luxembourg law which was paid upon incorporation. Under current law and practice, no capital gains tax is payable in Luxembourg on the realised or unrealised capital appreciation of the assets of the SICAV.

NOTE 9 - STATEMENT OF CHANGES IN PORTFOLIO

A copy of the list of changes in the securities portfolio of the Sub-Funds may be obtained free of charge at the registered office of the SICAV.

NOTE 10 - TRANSACTION FEES

For the year ended December 31, 2023 the SICAV incurred transaction costs which have been defined as brokerage fees, relating to purchase or sale of transferable securities, money market instruments, derivatives, or other eligible assets. The SICAV also incurred transaction costs charges by the Custodian Agent and relating to purchase and sale of transferable securities.

Depositary transaction costs are recorded in the Statement of Operations and Changes in Net Assets under the caption "Other expenses" and are as follow:

SANTANDER SELECT INCOME	EUR	1,493,000	FR0013508470 - OAT 0.00% 25/02/2026	J.P. Morgan SE

NOTE 19 - CROSS SUB-FUNDS INVESTMENTS

At December 31, 2023, the total cross Sub-Funds investment amounted to EUR 13,024,100 and therefore the total combined Net Assets at year-end without cross Sub-Funds investment would amount to EUR 4,474,446,364.

NOTE 20 - SIGNIFICANT EVENTS

The Manager has made a regular assessment since end of February of the situation of the SICAV in the context of the Russian invasion of Ukraine and of the subsequent international sanctions enacted against Russia and Russian individuals and confirmed that the SICAV held in early March 2022 a very limited exposure to Russia and Ukraine.

Taking this into account, the Manager confirms that it has no plan to terminate the SICAV either as of the date of the Auditors' opinion or in the foreseeable future. The Manager will continue to closely monitor the situation of the SICAV in the best interests of the shareholders.

Notes to the financial statements as at December 31, 2023 (continued)

NOTE 21 - SUBSEQUENT EVENTS

On January 9, 2024 Gotham City Research, a short-seller investor, issued a report questioning the financial statements of Grifols, S.A., a pharmaceutical company listed in Spain, which caused the share price to fall sharply. At year end, three Sub-Funds (SANTANDER PROSPERITY, SANTANDER EUROPEAN DIVIDEND and SANTANDER AM EURO EQUITY) held significant positions in the stock, a large part of which was sold in the days following the publication of this information. Taking this into account, the Manager confirms that it has no plan to terminate the SICAV either as of the date of the auditors' opinion or in the foreseeable future. The Manager will continue to closely monitor the situation of the SICAV in the best interests of the shareholders.

NOTE 22 - SUSTAINABLE FINANCE DISCLOSURE REGULATION ("SFDR")

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities, except for those with the following annexes attached.

The Sub-Fund SANTANDER PROSPERITY has a sustainable investment objective within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") as set out in the Annex I of the Prospectus.

The following Sub-Funds promote environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector ("SFDR") as set out in the Annex I of the Prospectus:

SANTANDER GO SHORT DURATION DOLLAR
SANTANDER EUROPEAN DIVIDEND
SANTANDER AM EURO CORPORATE BOND
SANTANDER AM EURO EQUITY
SANTANDER ACTIVE PORTFOLIO 1
SANTANDER ACTIVE PORTFOLIO 2
SANTANDER CORPORATE COUPON
SANTANDER SELECT DEFENSIVE
SANTANDER SELECT MODERATE
SANTANDER SELECT DYNAMIC
SANTANDER MULTI INDEX SUBSTANCE
SANTANDER MULTI INDEX BALANCE
SANTANDER MULTI INDEX AMBITION
SANTANDER SELECT INCOME
SANTANDER GO GLOBAL EQUITY ESG
SANTANDER COVERED BOND
SANTANDER LATIN AMERICAN INVESTMENT GRADE ESG BOND
SANTANDER FUTURE WEALTH
SANTANDER US EQUITY ESG
SANTANDER TARGET MATURITY 2025 EURO

Information on environmental and/or social characteristics and/or sustainable investments is available in the relevant annexes under the Sustainable Finance Disclosure Regulation section

Appendix: Unaudited Additional Disclosures

APPENDIX 1: GLOBAL RISK MANAGEMENT

In terms of risk management, the Board of Directors of the SICAV selected the commitment approach in order to determine the global risk for the following Sub-Funds:

- SANTANDER GO SHORT DURATION DOLLAR
- SANTANDER LATIN AMERICAN CORPORATE BOND
- SANTANDER GO NORTH AMERICAN EQUITY
- SANTANDER EUROPEAN DIVIDEND
- SANTANDER AM LATIN AMERICAN FIXED INCOME
- SANTANDER AM EURO CORPORATE BOND
- SANTANDER AM EURO EQUITY
- SANTANDER AM LATIN AMERICAN EQUITY OPPORTUNITIES
- SANTANDER ACTIVE PORTFOLIO 1
- SANTANDER ACTIVE PORTFOLIO 2
- SANTANDER CORPORATE COUPON
- SANTANDER SELECT DEFENSIVE
- SANTANDER SELECT MODERATE
- SANTANDER SELECT DYNAMIC
- SANTANDER MULTI INDEX SUBSTANCE
- SANTANDER MULTI INDEX BALANCE
- SANTANDER MULTI INDEX AMBITION
- SANTANDER GO GLOBAL EQUITY ESG
- SANTANDER COVERED BOND
- SANTANDER LATIN AMERICAN INVESTMENT GRADE ESG BOND
- SANTANDER FUTURE WEALTH
- SANTANDER PROSPERITY
- SANTANDER TARGET MATURITY 2026 EURO
- SANTANDER TARGET MATURITY 2026 DOLLAR
- SANTANDER GO ASIAN EQUITY
- SANTANDER US EQUITY ESG
- SANTANDER TARGET MATURITY 2025 EURO

In terms of risk management, the Board of Directors of the SICAV selected the VAR approach in order to determine the global risk for the following Sub-Funds:

- SANTANDER SELECT INCOME
- SANTANDER GO ABSOLUTE RETURN
- SANTANDER GO DYNAMIC BOND
- SANTANDER GO GLOBAL HIGH YIELD BOND
- SANTANDER GLOBAL VOLATILITY

The Management Company of the Fund after a risk profile assessment, decides between the commitment approach and the VaR (99%, 1 Month) to determine the global market risk exposure.

The VaR limit use (minimum, maximum and average) is calculated by dividing the Daily VaR by the daily VaR limit (20% for absolute return VaR Sub-Fund).

SANTANDER SICAV

Appendix: Unaudited Additional Disclosures (continued)

APPENDIX 1: GLOBAL RISK MANAGEMENT (CONTINUED)

The global market risk exposure information for the Sub-Funds using VaR for the year ending December 31, 2023, is as follows:

Sub-Fund	Global Risk calculation Method	VaR model	Reference Portfolio	VaR limit	Lowest utilisation of VaR limit	Highest utilisation of VaR limit	Average utilisation of VaR limit	Average level of leverage reached during the year
SANTANDER SELECT INCOME	Absolute VaR	Historical VaR	No Benchmark	20%	1.34%	4.74%	2.61%	53.14%
SANTANDER GO ABSOLUTE RETURN	Absolute VaR	Historical VaR	No Benchmark	20%	1.95%	5.85%	3.98%	799.88%
SANTANDER GO DYNAMIC BOND	Absolute VaR	Historical VaR	No Benchmark	20%	1.05%	2.68%	1.73%	242.97%
SANTANDER GO GLOBAL HIGH YIELD BOND	Absolute VaR	Historical VaR	No Benchmark	20%	3.61%	9.59%	5.88%	31.75%
SANTANDER GLOBAL VOLATILITY	Absolute VaR	Historical VaR	No Benchmark	20%	1.43%	1.95%	1.71%	142.40%

APPENDIX 2: REMUNERATION OF THE MEMBERS OF THE MANAGEMENT COMPANY OF THE SICAV

The Management Company of the SICAV has adopted a Remuneration Policy, which is in accordance with the principles established by the law of May 10, 2016, amending the law of December 17, 2010 ("the UCITS Law"). The remuneration policy is aligned with Santander Asset Management Group's remuneration policy, based on the principles of competitiveness and fairness.

The Management Company of the SICAV has established remuneration policies for those categories of staff, including senior management, risk takers, control functions, and any employees within the Management Company of the SICAV receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers and whose professional activities have a material impact on the risk profiles of the Management Company of the SICAV, that:

- are compliant with and promote a sound and effective risk management and do not encourage risk-taking which is inconsistent with the risk profiles of the SICAV or with its Articles of Incorporation;
- are in line with the business strategy, objectives values and interests of the Management Company of the SICAV and which do not interfere with the obligation of the Management Company of the SICAV to act in the best interests of the SICAV and of its investors;
- include an assessment process based on the longer-term performance of the SICAV; and
- appropriately balance fixed and variable components of total remuneration.

The Board, in its supervisory function, is required to approve the remuneration policy and to oversee its implementation. The Board has the primary responsibility for ensuring that the ultimate goal of having sound and prudent remuneration policy and structures is not improperly circumvented. The Conducting Officers are in charge of making sure that the remuneration policy is implemented. They elaborate procedures to this effect and submit them to the Board. By virtue of the principle of proportionality, the Management Company has not yet a remuneration committee.

Appendix: Unaudited Additional Disclosures (continued)

APPENDIX 2: REMUNERATION OF THE MEMBERS OF THE MANAGEMENT COMPANY OF THE SICAV (CONTINUED)

The Management Company offers to its employees a remuneration package that includes:

- (i) a fixed salary,
- (ii) a variable pay and
- (iii) benefits.

The fixed salary represents the main component of the total remuneration and the payment of a variable pay is not mandatory. All employees are eligible to receive a variable pay. The Management Company only pays variable remuneration in the form of bonuses payable up-front directly in full after their allocation. By virtue of the principle of proportionality the Management Company does not pay variable remuneration in shares or in other type of financial instruments issued by the UCITS. The Management Company offers fixed salaries whose amount is based on criteria such as the level of education, the degree of seniority, the level of expertise and skills required the constraints and job experience, the relevant business sector and region. In the calculation of the variable pay, the Management Company uses an award process taking into account risk measurement while assessing performance.

An annual appraisal process is used to evaluate and measure each employee's performance against defined objectives. The performance of an employee is measured through qualitative and quantitative criteria based on various factors (i.e. business and financial results, client service, technical skills, etc.). The Management Company takes into account the individual performance of the employee and of his/her business unit as well as of the UCITS managed and of the overall of the result of the Company.

The benefits that employees of the Management Company may receive are excluded from the remuneration policy and thus not subject to binding calculation process. To that extent, benefits are given to employees on a non- discretionary basis and are identical for all employees. Total number of employees as of December 31, 2023 was 12 full time employees (12).

The Director position of the Management Company of the SICAV is not remunerated from the accounts of the Management Company of the SICAV. The Management Company contemplates to appoint independent director(s) in accordance with the UCITS Directive, who will only receive a fixed remuneration.

The total amount of such remuneration paid in respect of the financial year ending December 31, 2023 by the Management Company to its staff (12 beneficiaries as at December 31, 2023) and in relation to the activity taken for this Fund is EUR 868,124, which is comprised of a fixed remuneration of EUR 731,747, and a variable remuneration of EUR 136,377.

The fixed remuneration of the independent director(s) of the financial year ending December 31, 2023, is EUR 25,000.

The risk management function has assessed how the variable remuneration structure affects the risk profile of the Management Company. The compliance function analysed how the remuneration structure affects the Management Company's compliance with legislation, regulations and internal policies. The Management Company of the SICAV is not aware of any deficiency in the remuneration policy. Moreover, the remuneration policy has not been updated in the course of the financial year ended December 31, 2023.

Details of the remuneration policy of the Management Company of the SICAV, including, but not limited to, a description of how remuneration and benefits are calculated and the identity of persons responsible for awarding the remuneration and benefits are available at <http://www.santanderassetmanagement.lu>. A paper copy will be made available free of charge upon request.

SANTANDER SICAV

Independent Limited Assurance Report on the SFDR periodic reporting

To the Board of Directors of
SANTANDER SICAV

We have performed a limited assurance engagement with respect to the periodic reporting according to the Regulation (EU) 2019/2088 (SFDR) on sustainability-related disclosures in the financial sector (the “SFDR periodic reporting”) of the sub-funds of Santander SICAV (the “Fund”) as detailed in the Appendix 1 for the year ended 31 December 2023.

Criteria

The criteria used by Santander SICAV to prepare the SFDR periodic reporting is set out in the Appendix 2 (the “Criteria”) which are based on the requirements from the Article 11 of SFDR as well as the requirements of the articles 5 and 6 of the Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (the “EU Taxonomy”).

Responsibilities of the Board of Directors

The Board of Directors of the Fund is responsible for the preparation of the SFDR periodic reporting in accordance with the Criteria, including the selection and consistent application of appropriate indicators and calculation methods as well as making assumptions and estimates, which are reasonable in the circumstances. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation of the SFDR periodic reporting that is free from material misstatement, whether due to fraud or error.

Inherent limitations

The absence of a significant body of established practice on which to draw to evaluate and measure non-financial information allows for different, but acceptable, measures and measurement techniques and can affect comparability between entities. In addition, we do not provide any assurance over the source information that the Fund obtained directly from the investments or third-party experts.

Our Independence and Quality Management

We have complied with the independence and other ethical requirements of the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF), which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

Our firm applies International Standard on Quality Management 1, as adopted for Luxembourg by the CSSF, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Responsibility of the “Réviseur d’entreprises agréé”

Our responsibility is to express a limited assurance conclusion on the SFDR periodic reporting based on the procedures we have performed and the evidence we have obtained. We conducted our limited assurance engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3000 (Revised) *Assurance Engagements other than Audits or Reviews of Historical Financial Information*, as adopted for Luxembourg by the “Institut des Réviseurs d’Entreprises”. This Standard requires that we plan and perform our engagement to obtain limited assurance about whether the SFDR periodic reporting is free from material misstatement.

A limited assurance engagement involves assessing the suitability in the circumstances of the Fund’s use of the Criteria as the basis for the preparation of the SFDR periodic reporting, assessing the risks of material misstatement of the SFDR periodic reporting whether due to fraud or error, responding to the assessed risks as necessary in the circumstances, and evaluating the overall presentation of the SFDR periodic reporting. A limited assurance engagement is substantially less in scope than a reasonable assurance engagement in relation to both the risk assessment procedures, including an understanding of internal control, and the procedures performed in response to the assessed risks.

Summary of work performed

The procedures we performed were based on our professional judgment and included inquiries, observation of processes performed, inspection of documents, analytical procedures, evaluating the appropriateness of quantification methods and reporting policies, and agreeing or reconciling with underlying records.

Given the circumstances of the engagement, in performing the procedures listed above, we:

- gained an understanding of the process of compilation of the SFDR periodic reporting;
- gained an understanding of the Criteria and its suitability for the evaluation of the SFDR periodic reporting;
- gained an understanding of the design and operation of the controls in place in relation to the preparation of the SFDR periodic reporting;
- evaluated the reasonableness of those estimates and judgements made by management in the preparation of the information included in the SFDR periodic reporting, that we considered relevant for the purpose of our limited assurance conclusion;
- performed substantive testing using sampling techniques on the information included in the SFDR periodic reporting, and assessing the related disclosures; and
- reconciled disclosures with the corresponding data in the audited financial statements, when applicable.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement. Accordingly, we do not express a reasonable assurance opinion about whether the SFDR periodic reporting has been prepared, in all material respects, in accordance with the Criteria.

Limited Assurance Conclusion

Based on the procedures we have performed and evidence we have obtained, nothing has come to our attention that causes us to believe that the SFDR periodic reporting for the year ended 31 December 2023 has not been prepared, in all material respects, in accordance with the Criteria.

Other matter

The comparative information of the Fund as at 31 December 2022 has not been subject to any assurance procedure in accordance with ISAE 3000.

This report, including the opinion, has been prepared for and only for the Board of Directors of the Fund and the Shareholders in accordance with the terms of our engagement letter and is not suitable for any other purpose. We do not accept any responsibility to any other party to whom it may be distributed.

Appendix 2

Criteria

Criteria

- Appropriate use of the Annex IV (for Article 8 products) and Annex V (for Article 9 products) of the Regulation 2022/1288 of 6 April 2022 supplementing Regulation (EU) 2019/2088 of the European Parliament and of the Council with regard to regulatory technical standards, as amended (the “RTS”);
- Conformity of the client’s Sustainable Finance Disclosure Regulation (SFDR) periodic reporting layout vis-à-vis the general principles for the presentation of information stated in the Article 2 of the RTS;
- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088, as amended (the “SFDR Regulation”) Art. 11 to the disclosure made in the SFDR periodic reporting;
- All relevant sections of either the Annex IV or V of the RTS, and relevant requirements as defined in the RTS, have been included and responded to;
- Consistency of the qualitative statement of sustainable indicators with the evidence obtained for the numeric information on those indicators;
- Appropriate application of the formula according to the RTS in the following questions:
 - What were the top investments of this financial product?
 - What was the proportion of sustainability-related investments?
- Consistency of the information described in the financial information of the annual report with the SFDR Periodic reporting;
- When applicable, consistency of the information described in the SFDR Periodic reporting with the information disclosed in the pre-contractual documents (Prospectus “Investment policy section” & RTS Annex II-III).

Where at least one Sub-Fund is not having sustainable investments

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088 Art. 11 to the methodology related to the promotion of environmental or social characteristics (the “*Methodology for E/S characteristics*”) described in the website disclosure according to SFDR Regulation 2019/2088 Art. 10.1(b);
- Appropriate design of the formulas with the Methodology for E/S characteristics (the “E/S Characteristics Formulas”);
- Appropriate application of the E/S Characteristics Formulas.

Where at least one Sub-Fund is having sustainable investments according to the Article 2(17) of the SFDR RTS and opt to report a 0% Taxonomy alignment

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088 Art. 2(17) to the methodology (the “*Sustainable Investments Methodology*”) described in the website disclosure according to SFDR Regulation 2019/2088 Art. 10.1(b);
- Appropriate design of the formula with the Sustainable Investments Methodology (the “SFDR Sustainable Investments Formulas”);
- Appropriate application of the SFDR Sustainable Investments Formulas.

Appendix 2
Criteria

Where at least one Sub-Fund is having sustainable investments according to the Article 3 of the EU Taxonomy Regulation 2020/852 and not per SFDR Article 2(17)

- Appropriate application of the methodology outlined in EU Taxonomy Regulation 2020/852;
- Appropriate design of the formula with the EU Taxonomy Regulation 2020/852 (the “EU Taxonomy Formulas”);
- Appropriate application of the EU Taxonomy Formulas.

Where at least one Sub-Fund is having sustainable investments according to the Article 2(17) of the SFDR RTS and also opt to report following the EU Taxonomy

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088 Art. 2(17) to the methodology (the “*Sustainable Investments Methodology*”) described in the website disclosure according to SFDR Regulation 2019/2088 Art. 10.1(b);
- Appropriate design of the formula with the Sustainable Investments Methodology (the “SFDR Sustainable Investments Formulas”);
- Appropriate application of the methodology outlined in EU Taxonomy Regulation 2020/852;
- Appropriate design of the formula with the EU Taxonomy Regulation 2020/852 (the “EU Taxonomy Formulas”);
- Appropriate application of the SFDR Sustainable Investments Formulas and EU Taxonomy Formulas.

Where at least one Sub-Fund is opting to report the Principal Adverse Impact

- Appropriate design of the formulas with the elements outlined in the Annex I supplementing the EU Regulation 2019/2088 (the “PAI formulas”);
- Appropriate application of the PAI formulas.

Where at least one Sub-Fund has designated an index as a reference benchmark

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088 Art. 11 1. (b) (ii) to the design of the formulas (the “Benchmark Formulas”);
- Appropriate application of the Benchmark Formulas.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective**: ___%

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 40.01% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Strategy set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having positive environmental and/or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (as defined in the Top Investments section). At the end of the reference period, the Strategy held 74.36% of investments with positive environmental and/or social characteristics and 40.01% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria are underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and/or social characteristics and those that meet the thresholds for being considered as sustainable investments.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Strategy promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Strategy fully excluded issuers that are

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

- Exclusion of issuers that are involved in any controversial weapons production and/or participation.
- Exclusion of issuers that have revenues >25% in thermal coal production.
- Exclusion of issuers that have revenues >25% in coal power generation production.
- Exclusion of issuers that have revenues >30% in unconventional fossil fuels production/participation. We define unconventional fossil fuels as the sum of the production and/or participation in oil sands, shale energy and arctic oil.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Strategy incorporated a peer group comparison and screened out issuers that did not score in the top 80% relative to peers based on good governance indicators.

The Strategy had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual% of assets allocated to the relevant issuers for the reference period exhibiting such characteristics.

In summary: the Strategy met its pre-contractual committed minimums related to environmental and/or social characteristics and sustainable investments policy throughout the reference period. The Strategy applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Strategy were met is based on whether the Strategy held any positions in issuers during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such issuers were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

● ***How did the sustainability indicators perform?***

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and/or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and/or social characteristics that the Strategy promotes.

The methodology was based on an issuer's management of relevant environmental or social issues such as its toxic emissions, waste management, labor relations and safety issues, diversity/independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, an issuer must score in the top 80% relative to the Strategy's custom universe on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Strategy held 74.36% of investments with positive environmental and/or social characteristics and 40.01% of sustainable investments.

In respect of the applied norms and values-based exclusions, the Investment Manager utilized data to measure an issuer's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Strategy had no specific allocation targets in favor of either environmental or social characteristics and therefore the performance of the indicators in respect of the specific environmental or social characteristics is not set out here.

● ***... And compared to previous periods?***

It does not apply as there is no previous periodic report.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?***

The objectives of the sustainable investments that the Strategy partially made was comprised of any individual or combination of the following during the reference period:

Environmental objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture.

Contribution to such objectives is determined by either (i) products and services sustainability indicators, which may include the percentage of revenue derived from providing products and / or services that contribute to the relevant sustainable objective, such as company producing solar panels or clean energy technology that meets the Investment

Manager's proprietary thresholds contributing to climate risk mitigation. The current percentage of revenue is set at a minimum of 20% and the entire holding in the issuer is considered a Sustainable Investment; (ii) the use of proceeds of the issue, if such use is designated as linked to a specific environmental or social objective, or (iii) being an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to peers based on certain operational sustainability indicators. For example, scoring in the top 20% relative to peers on total waste impact contributes to a transition to a circular economy. The test for supranational and sovereign issuers may consider the issuer's mission or contributions, as peer group leaders or improvers, to positive environmental and social objectives subject to certain criteria.

The actual contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the reference period. The Strategy was required to invest 10% in sustainable investments. At no time during the period did the Strategy hold sustainable investments below its committed minimum. At the end of the reference period, 40.01% of its assets were sustainable investments

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Strategy intended to make were subject to a screening process that sought to identify and exclude from qualifying as a sustainable investment, those issuers which the Investment Manager considered the worst performing issuers, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those issuers demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those issuers that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively).

Indicators 10 - 14 relate to an issuer's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude issuers that may cause significant harm. It used a subset for engagement with certain issuers, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee issuers themselves and/or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by issuers or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises, controversial weapons and investee countries subject to social violations. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee issuers in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager currently uses greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions. In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, the Investment Manager used a third-party representative proxy rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

Engagement

In addition to screening out certain issuers as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee issuers. A subset of the indicators was used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee issuers in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emission of air pollutants and number of days lost to injuries, accidents, fatalities or illness.

Indicators of Sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways requires an issuer to be considered as an operational peer group leader to qualify as a sustainable investment. This requires scoring against the indicator in the top 20% relative to the benchmark (ICE 1-3 Year US Corporate Index).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and/or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Strategy prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Strategy considered select principal adverse impacts on sustainability factors through a quantitative and qualitative approach. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It also used a subset for engagement seeking to influence best practice and it uses certain indicators to determine whether an investment is a Sustainable Investment. This process was subject to the quality, coverage, and availability of the corresponding data.

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions consider indicators 4 (in relation to exposure to companies active in the fossil fuel sector); and 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons; and finally, indicator 16 in regard to investee countries subject to social violations.

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators has been used, subject to certain technical considerations such as data coverage, as the basis for identifying those underlying investee companies that may be subject to an indicator led engagement. The indicators currently used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

At last, the Investment Manager considered all the required PAIs related to sustainable investments, and specifically used indicators 3, 9, and 13 in relation to GHG Intensity, Hazardous waste ratio and board gender diversity as indicators of sustainability to assist in qualifying an investment as a Sustainable Investment. In addition, the Investment Manager applied a purpose-built screen specific to sustainable investments which took into account greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions and indicator 9 in relation to hazardous waste.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29/11/2023-31/12/2023

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

What was the asset allocation?

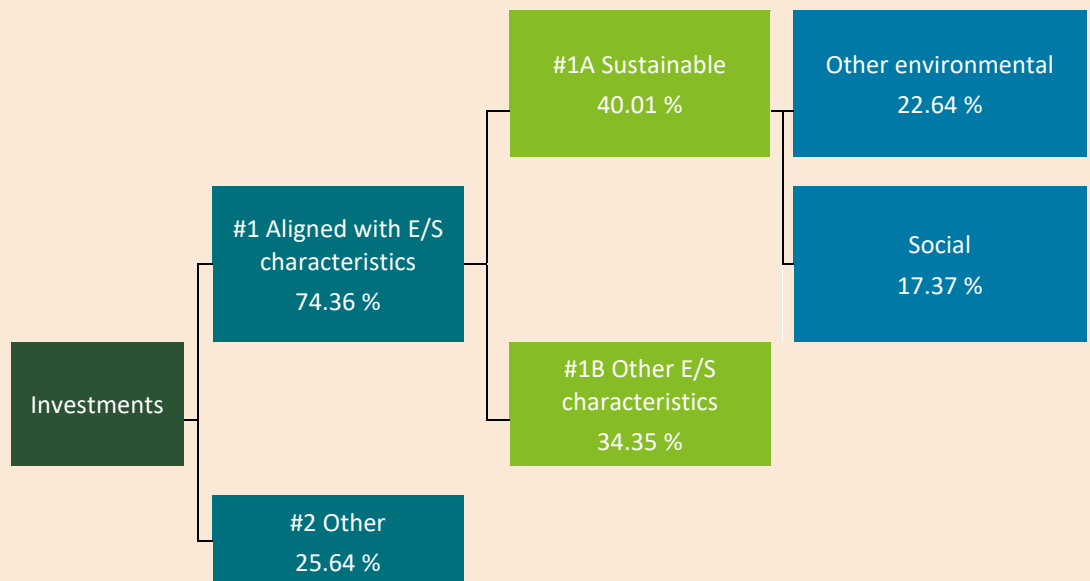

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 74.36 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 40.01 %, broken down into:
 - 17.37 % corresponding to socially sustainable investments.
 - 22.64 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Multi-Utilities	100.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more issuers disclose their alignment, and the data becomes more available.

The Strategy has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Strategy indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0%. Any alignment outlined below is a by-product of the Strategy's framework which considers investments that have environmental and/or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 82.3% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

0 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 0.26 % is aligned through enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

It does not apply as there is no previous periodic report.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 22.64 %.

 **What was the share of socially sustainable investments?**

The financial product had a share of investments with a social objective of 17.37 %.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The 25.64 % of assets in “other” investments were comprised of issuers that did not meet the criteria described in response to above question entitled, “How did the sustainability indicators perform?” to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary liquid assets, deposits with credit institutions, money market instruments/funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under “other”. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including “other” were subject to the following ESG Minimum Safeguards/principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (there include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of the assets in issuers with positive environmental and/or social characteristics.
- The value and norms-based screening to implement full exclusions in relation to issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco. Please refer to the exclusions policy for the Strategy on www.ipmorganassetmanagement.lu for further information by searching for your particular Strategy and accessing the ESG information section.
- The requirement for all issuers in the portfolio to follow good governance practices.

The Sub-Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

N/A

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective: ___%**
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: ___%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 52.3% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 89.42 %.

● **... And compared to previous periods?**

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as reported in the previous reference period.
- Controversy indicator: it has remained 0% as reported in the previous reference period.
- Average ESG rating of the Sub-Fund: the Investment Manager has reviewed the average ESG rating reported for 2022 and it was A-.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of

the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association (“ICMA”).

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer’s relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds’ PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2023-31/12/2023

Largest investments	Sector	% Assets	Country
EUR	Other	6.73%	LUXEMBOURG

APERAM SA COMMON STOCK	METALS - STEEL	1.68%	LUXEMBOURG

The top investments in the above table have been presented as a snapshot at 31 December 2022.

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

● What was the asset allocation?

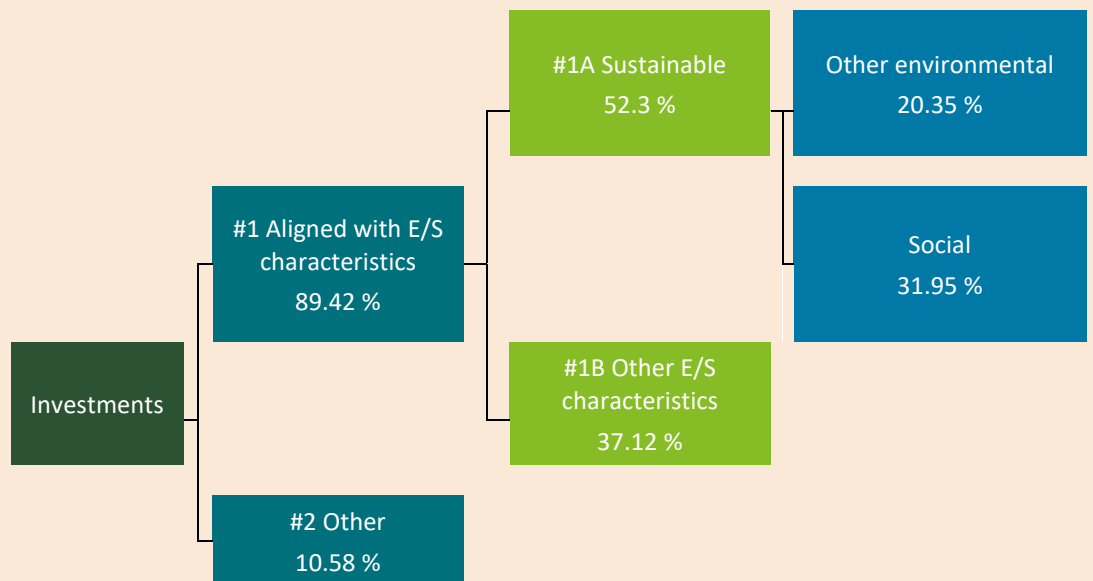

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 89.42 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 52.3 %, broken down into:
 - 31.95 % corresponding to socially sustainable investments.
 - 20.35 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

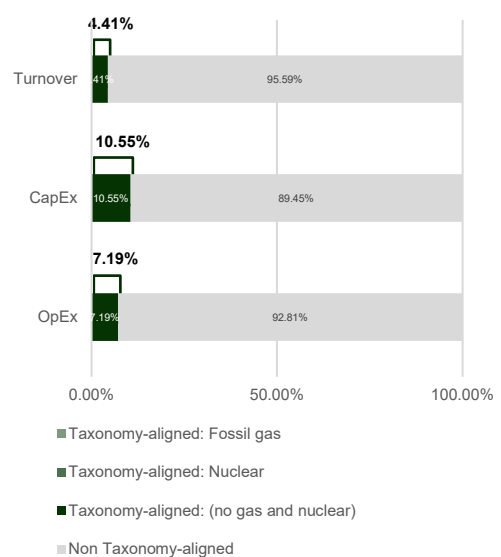

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

1.1 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 1.58 % is aligned through enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The percentage of investments aligned with the EU Taxonomy compared to the previous reference period has increased, from 2.06 % to 4.41 %.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 20.35 %.

 **What was the share of socially sustainable investments?**

The financial product had a share of investments with a social objective of 31.95 %.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The financial product had a 10.58 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.

- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> YES	<input checked="" type="radio"/> <input type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 44.3% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 93.34 %.

● **... And compared to previous periods?**

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as reported in the previous reference period.
- Controversy indicator: it has remained 0% as reported in the previous reference period.
- Average ESG rating of the Sub-Fund: the Investment Manager has reviewed the average ESG rating reported for 2022 and it was A-.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of

the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association (“ICMA”).

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer’s relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds’ PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2023-31/12/2023

The top investments in the above table have been presented as a snapshot at 31 December 2022.

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

● What was the asset allocation?

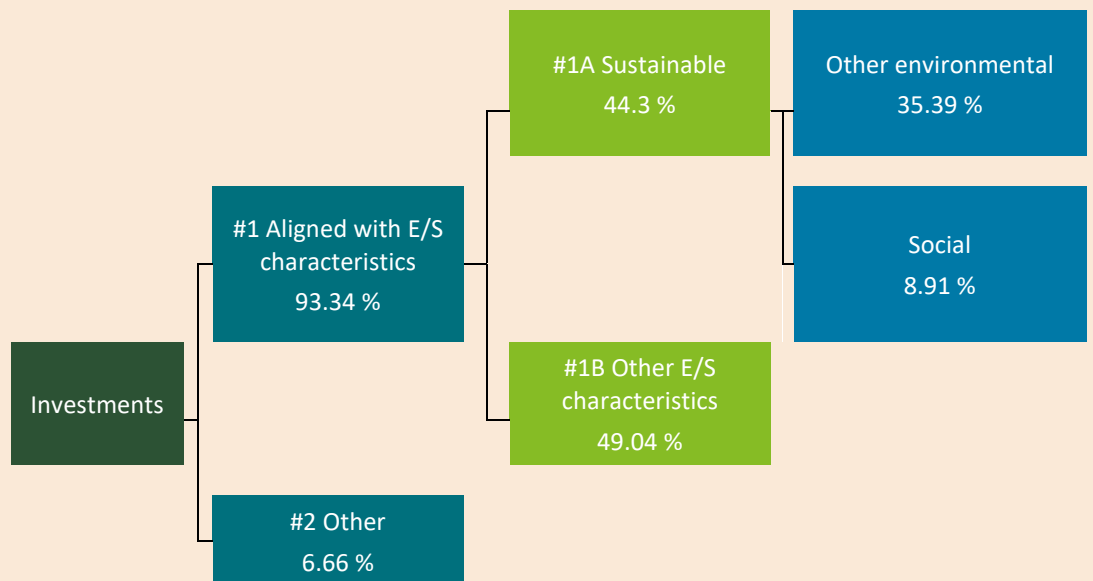

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 93.34 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 44.3 %, broken down into:
 - 8.91 % corresponding to socially sustainable investments.
 - 35.39 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 99.5% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.16 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 3.49 % is aligned through enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The percentage of investments aligned with the EU Taxonomy compared to the previous reference period has increased, from 2.15 % to 5.74 %.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 35.39 %.

 **What was the share of socially sustainable investments?**

The financial product had a share of investments with a social objective of 8.91 %.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The financial product had a 6.66 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.

- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective**: ___%

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.16% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 92.27 %.

● **... And compared to previous periods?**

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as reported in the previous reference period.
- Controversy indicator: it has remained 0% as reported in the previous reference period.
- Average ESG rating of the Sub-Fund: the Investment Manager has reviewed the average ESG rating reported for 2022 and it was A-.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of

the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association (“ICMA”).

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer’s relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds’ PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2023-31/12/2023

Largest investments	Sector	% Assets	Country
LVMH MOET HENNESSY LOUIS VUITTON SE COMMON STOCK	Textiles, Apparel & Luxury Goods	5.88%	FRANCE

ING GROEP NV COMMON	BANKING	2.07%	THE NETHERLANDS

The top investments in the above table have been presented as a snapshot at 31 December 2022.

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

What was the asset allocation?

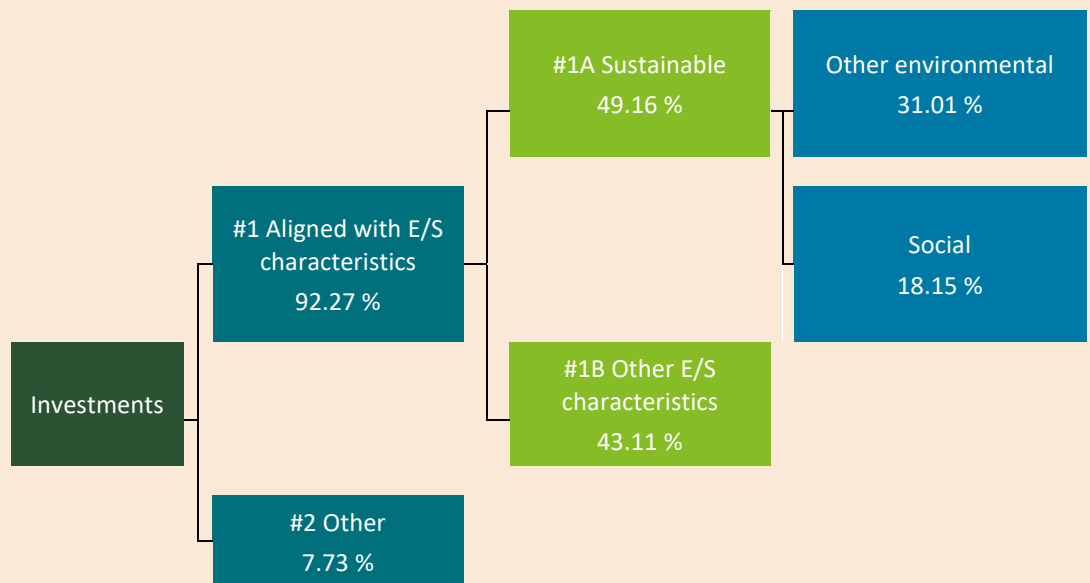

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 92.27 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 49.16 %, broken down into:
 - 18.15 % corresponding to socially sustainable investments.
 - 31.01 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.7 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 1.76 % is aligned through enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The percentage of investments aligned with the EU Taxonomy compared to the previous reference period has increased, from 2.63 % to 4.61 %.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 31.01 %.

 **What was the share of socially sustainable investments?**

The financial product had a share of investments with a social objective of 18.15 %.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The financial product had a 7.73 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective**: ___%

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 2.95% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 79.17 %.

● **... And compared to previous periods?**

It does not apply as there is no previous periodic report.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 12/05/2023-31/12/2023

Largest investments	Sector	% Assets	Country
UNITED STATES OF AMERICA NOTES FIXED 0.625%	Sovereigns	9.98%	UNITED STATES
UNITED STATES OF AMERICA NOTES FIXED 2.125%	Sovereigns	9.38%	UNITED STATES
UNITED STATES OF AMERICA NOTES FIXED 0.5%	Sovereigns	8.50%	UNITED STATES
UNITED STATES OF AMERICA NOTES FIXED 2.875%	Sovereigns	7.72%	UNITED STATES
JPMORGAN FUNDS - AGGREGATE BOND FUND OPEN-END FUND	Third-party fund	6.88%	LUXEMBOURG
UNITED STATES OF AMERICA NOTES FIXED 1.5%	Sovereigns	6.53%	UNITED STATES

UNITED STATES OF AMERICA NOTES FIXED 0.25%	Sovereigns	2.45%	UNITED STATES

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

● What was the asset allocation?

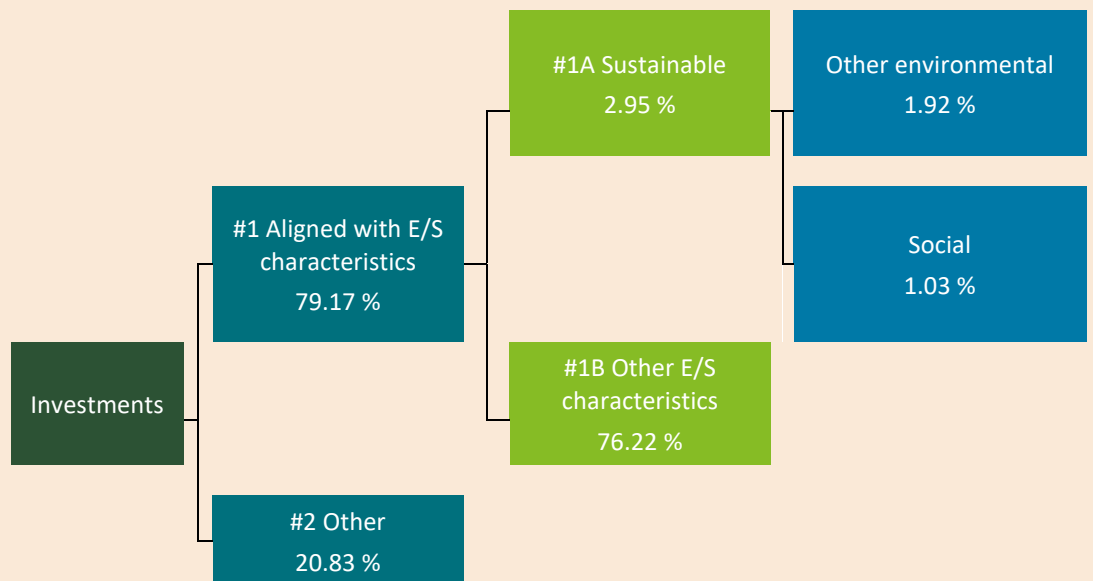

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 79.17 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 2.95 %, broken down into:
 - 1.03 % corresponding to socially sustainable investments.
 - 1.92 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Economic Sector	Sub-sector	Proportion
Sovereigns		56.17%
	Sovereign	100.00%
Third-party fund		28.32%
	Mutual Fund	96.49%
	Exchange Trade Fund	3.51%
Other		11.91%
	Other	100.00%
Commercial Banks		2.07%
	Diversified Banks	100.00%
Industrial Conglomerates		1.20%
	Industrial Conglomerates	100.00%
Oil, Gas & Consumable Fuels		0.34%
	Integrated Oil & Gas	100.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 39.2% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.01 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 0.04 % is aligned through enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

It does not apply as there is no previous periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 1.92 %.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 1.03 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 20.83 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but

that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.

- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> YES	<input type="checkbox"/> <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 3.25% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 75.16 %.

● **... And compared to previous periods?**

It does not apply as there is no previous periodic report.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 12/05/2023-31/12/2023

Largest investments	Sector	% Assets	Country
USD	Other	8.71%	LUXEMBOURG

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

● What was the asset allocation?

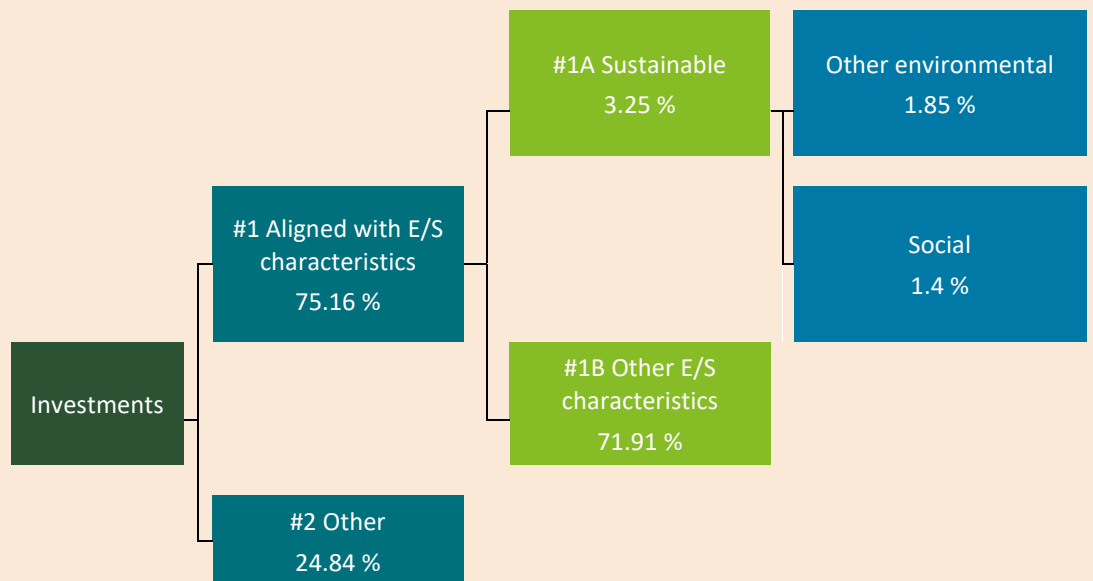

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 75.16 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 3.25 %, broken down into:
 - 1.4 % corresponding to socially sustainable investments.
 - 1.85 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Economic Sector	Sub-sector	Proportion
Sovereigns		43.65%
	Sovereign	100.00%
Third-party fund		30.74%
	Mutual Fund	98.13%
	Exchange Trade Fund	1.87%
Other		17.18%
	Other	100.00%
Commercial Banks		7.28%
	Regional Banks	67.47%
	Diversified Banks	32.53%
Industrial Conglomerates		0.71%
	Industrial Conglomerates	100.00%
Oil, Gas & Consumable Fuels		0.43%
	Integrated Oil & Gas	100.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

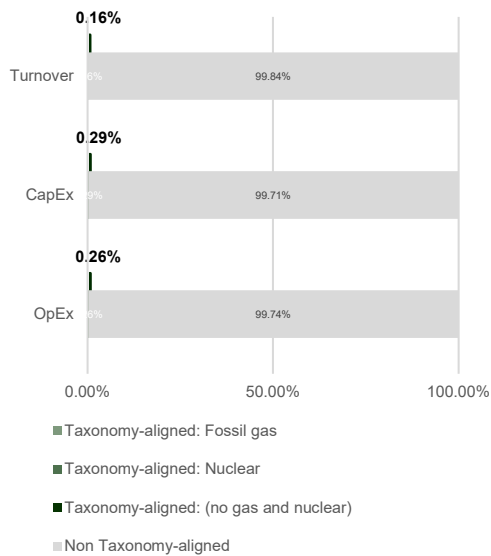

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 48.7% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.01 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 0.05 % is aligned through enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

It does not apply as there is no previous periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 1.85 %.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 1.4 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 24.84 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but

that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.

- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective**: ___%

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.59% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 97.11 %.

● **... And compared to previous periods?**

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as reported in the previous reference period.
- Controversy indicator: it has remained 0% as reported in the previous reference period.
- Average ESG rating of the Sub-Fund: the Investment Manager has reviewed the average ESG rating reported for 2022 and it was A-.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of

the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association (“ICMA”).

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer’s relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds’ PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2023-31/12/2023

Largest investments	Sector	% Assets	Country

The top investments in the above table have been presented as a snapshot at 31 December 2022.

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

What was the asset allocation?

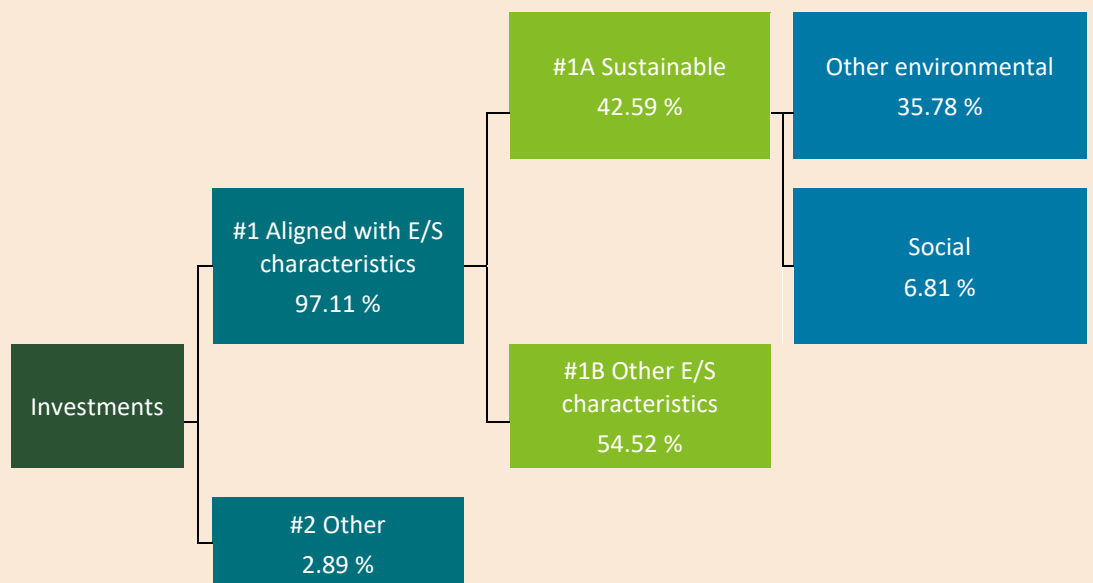

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 97.11 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 42.59 %, broken down into:
 - 6.81 % corresponding to socially sustainable investments.
 - 35.78 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.02 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 0.53 % is aligned through enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The percentage of investments aligned with the EU Taxonomy compared to the previous reference period has decreased, from 2.07 % to 2.05 %

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 35.78 %.

 **What was the share of socially sustainable investments?**

The financial product had a share of investments with a social objective of 6.81 %.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The financial product had a 2.89 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.

- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective**: ___%

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 11.59% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 93.51 %.

● **... And compared to previous periods?**

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as reported in the previous reference period.
- Controversy indicator: it has remained 0% as reported in the previous reference period.
- Average ESG rating of the Sub-Fund: the Investment Manager has reviewed the average ESG rating reported for 2022 and it was A-.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of

the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer’s relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds’ PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2023-31/12/2023

The top investments in the above table have been presented as a snapshot at 31 December 2022.

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

What was the asset allocation?

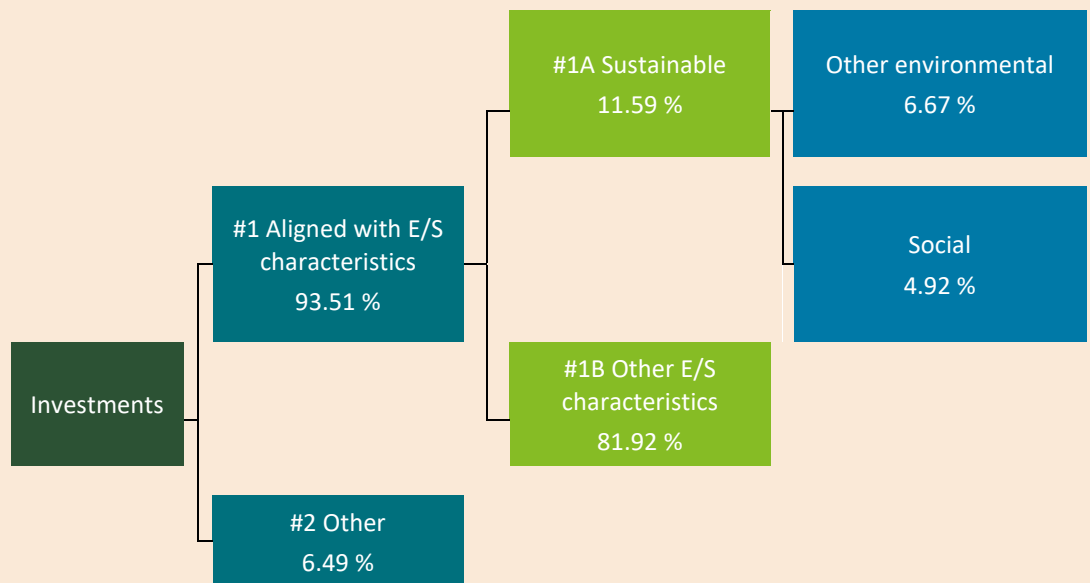

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 93.51 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 11.59 %, broken down into:
 - 4.92 % corresponding to socially sustainable investments.
 - 6.67 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Economic Sector	Sub-sector	Proportion
Third-party fund		60.88%
	Exchange Trade Fund	60.26%
	Mutual Fund	39.74%
Sovereigns		32.28%
	Sovereign	100.00%
Other		4.45%
	Other	100.00%
Capital Markets		2.39%
	Asset Management & Custody Banks	51.08%
	Investment Banking & Brokerage	48.92%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 68.7% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.1 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 0.9 % is aligned through enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The percentage of investments aligned with the EU Taxonomy compared to the previous reference period has increased, from 0.65 % to 1.67 %.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 6.67 %.

 **What was the share of socially sustainable investments?**

The financial product had a share of investments with a social objective of 4.92 %.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The financial product had a 6.49 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.

- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective**: ___%

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 6.8% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 91.8 %.

● **... And compared to previous periods?**

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as reported in the previous reference period.
- Controversy indicator: it has remained 0% as reported in the previous reference period.
- Average ESG rating of the Sub-Fund: the Investment Manager has reviewed the average ESG rating reported for 2022 and it was A-.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of

the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association (“ICMA”).

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer’s relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds’ PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2023-31/12/2023

Largest investments	Sector	% Assets	Country

The top investments in the above table have been presented as a snapshot at 31 December 2022.

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

● What was the asset allocation?

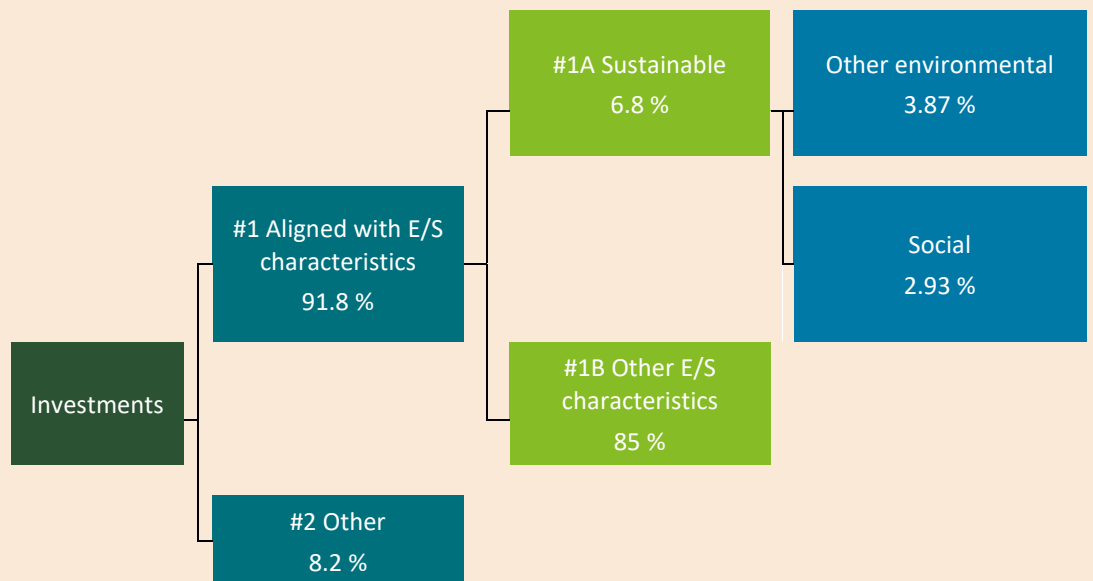

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 91.8 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 6.8 %, broken down into:
 - 2.93 % corresponding to socially sustainable investments.
 - 3.87 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Economic Sector	Sub-sector	Proportion
Third-party fund		67.14%
	Exchange Trade Fund	73.19%
	Mutual Fund	26.81%
Sovereigns		25.66%
	Sovereign	100.00%
Other		5.33%
	Other	100.00%
Capital Markets		1.87%
	Asset Management & Custody Banks	50.44%
	Investment Banking & Brokerage	49.56%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 73% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.09 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 1.08 % is aligned through enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The percentage of investments aligned with the EU Taxonomy compared to the previous reference period has increased, from 0.95 % to 1.77 %.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 3.87 %.

 **What was the share of socially sustainable investments?**

The financial product had a share of investments with a social objective of 2.93 %.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The financial product had a 8.2 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.

- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective**: ___%

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 4.13% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 90.79 %.

● **... And compared to previous periods?**

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as reported in the previous reference period.
- Controversy indicator: it has remained 0% as reported in the previous reference period.
- Average ESG rating of the Sub-Fund: the Investment Manager has reviewed the average ESG rating reported for 2022 and it was A-.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of

the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association (“ICMA”).

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer’s relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds’ PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2023-31/12/2023

Largest investments	Sector	% Assets	Country
INVESCO S&P 500 UCITS ETF ETP USD	Third-party fund	14.23%	IRELAND

BNP PARIBAS EASY S&P 500	EXCHANGE-TRADED FUNDS	1.83%	FRANCE

The top investments in the above table have been presented as a snapshot at 31 December 2022.

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

● What was the asset allocation?

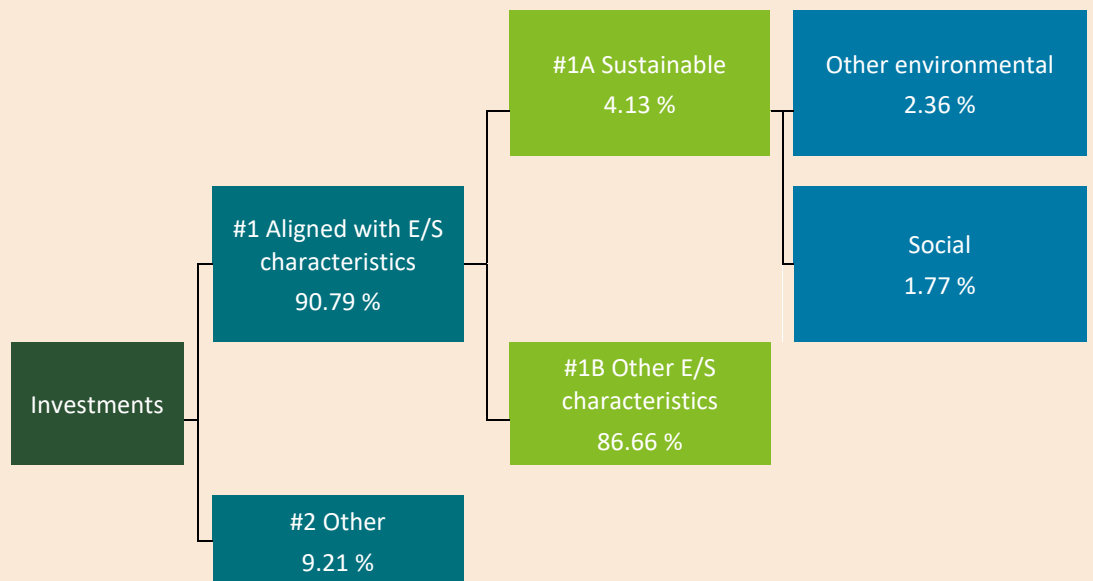

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 90.79 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 4.13 %, broken down into:
 - 1.77 % corresponding to socially sustainable investments.
 - 2.36 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Economic Sector	Sub-sector	Proportion
Third-party fund		75.66%
	Exchange Trade Fund	91.77%
	Mutual Fund	8.23%
Sovereigns		16.91%
	Sovereign	100.00%
Other		7.08%
	Other	100.00%
Capital Markets		0.35%
	Investment Banking & Brokerage	56.14%
	Asset Management & Custody Banks	43.86%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 82.8% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.07 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 1.31 % is aligned through enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The percentage of investments aligned with the EU Taxonomy compared to the previous reference period has increased, from 1.27 % to 1.88 %.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 2.36 %.

 **What was the share of socially sustainable investments?**

The financial product had a share of investments with a social objective of 1.77 %.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The financial product had a 9.21 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.

- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 6.56% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 98.99 %.

● **... And compared to previous periods?**

It does not apply as there is no previous periodic report.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 12/05/2023-31/12/2023

Largest investments	Sector	% Assets	Country
ISHARES EUR GOVT BOND 3-5YR UCITS ETF ETP GBP	Third-party fund	15.73%	IRELAND

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

What was the asset allocation?

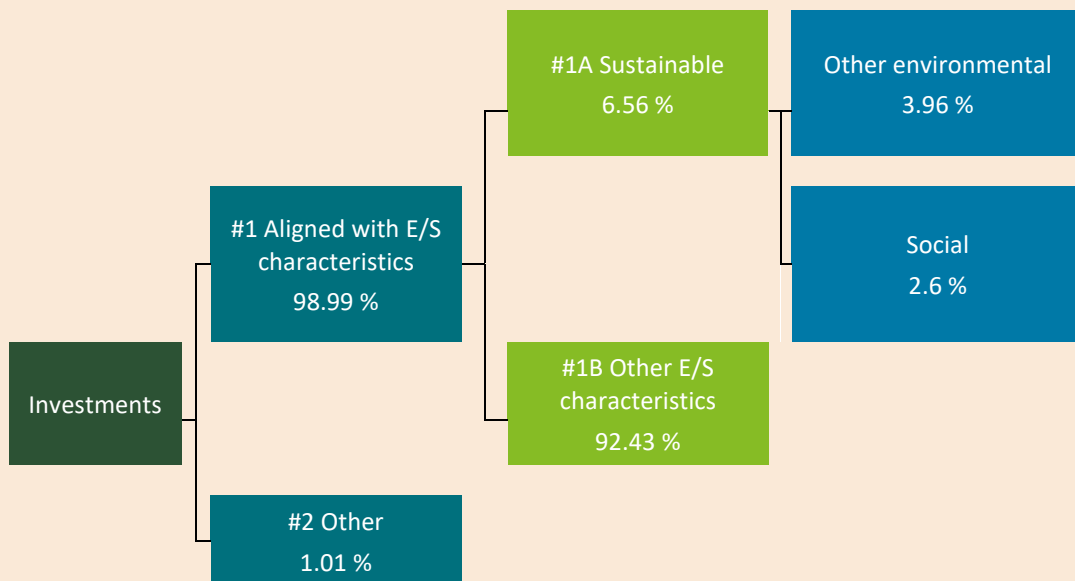

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 98.99 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 6.56 %, broken down into:
 - 2.6 % corresponding to socially sustainable investments.
 - 3.96 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Economic Sector	Sub-sector	Proportion
Third-party fund		99.02%
	Exchange Trade Fund	100.00%
Other		0.98%
	Other	100.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 47.2% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.05 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 0.72 % is aligned through enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

It does not apply as there is no previous periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 3.96 %.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 2.6 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 1.01 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but

that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.

- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 4.98% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 98.56 %.

● **... And compared to previous periods?**

It does not apply as there is no previous periodic report.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 12/05/2023-31/12/2023

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

● What was the asset allocation?

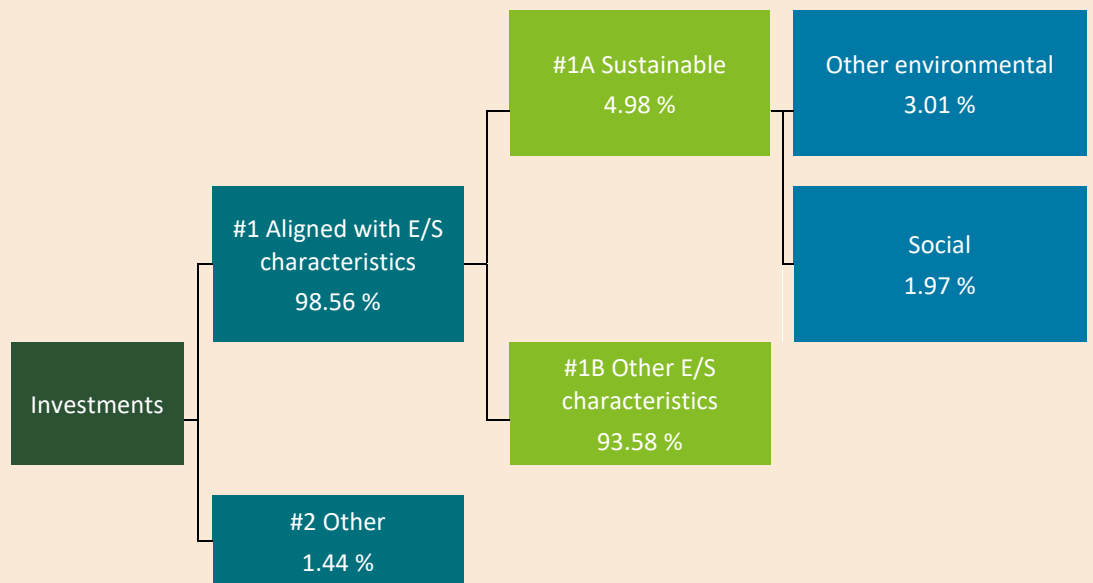

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 98.56 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 4.98 %, broken down into:
 - 1.97 % corresponding to socially sustainable investments.
 - 3.01 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Economic Sector	Sub-sector	Proportion
Third-party fund		98.54%
	Exchange Trade Fund	100.00%
Other		1.46%
	Other	100.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 63.3% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.05 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 0.97 % is aligned through enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

It does not apply as there is no previous periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 3.01 %.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 1.97 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 1.44 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but

that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.

- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective**: ___%

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 2.82% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 98.27 %.

● **... And compared to previous periods?**

It does not apply as there is no previous periodic report.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 12/05/2023-31/12/2023

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

What was the asset allocation?

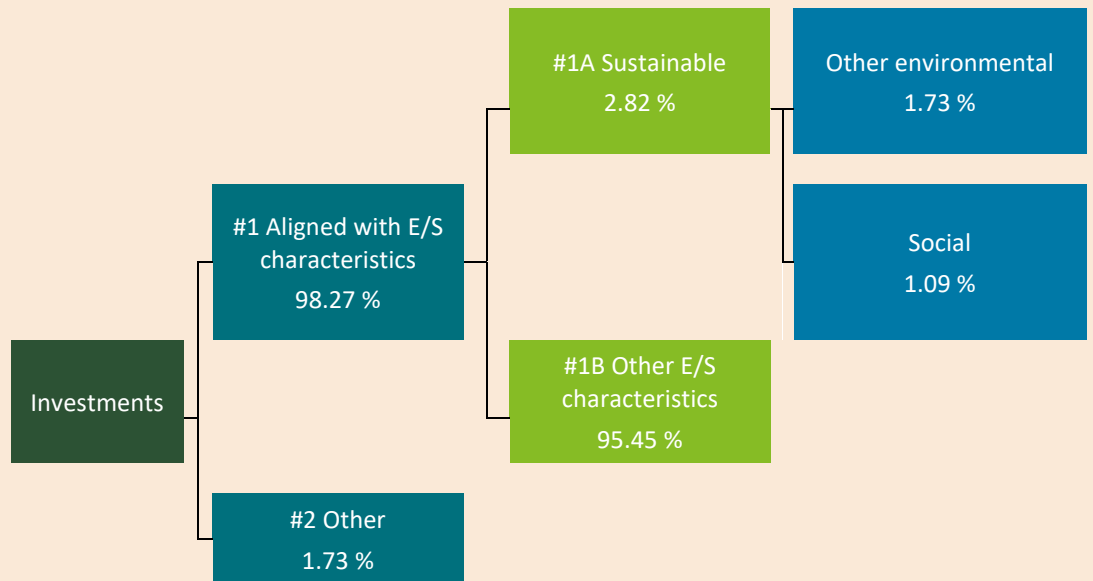

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 98.27 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 2.82 %, broken down into:
 - 1.09 % corresponding to socially sustainable investments.
 - 1.73 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Economic Sector	Sub-sector	Proportion
Third-party fund		98.40%
	Exchange Trade Fund	100.00%
Other		1.60%
	Other	100.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 81% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.06 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 1.25 % is aligned through enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

It does not apply as there is no previous periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 1.73 %.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 1.09 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 1.73 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but

that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.

- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective**: ___%

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 22.52% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 85.78 %.

● **... And compared to previous periods?**

It does not apply as there is no previous periodic report.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 29/11/2023-31/12/2023

Largest investments	Sector	% Assets	Country
EUR CASH AT BROKER	Other	3.16%	LUXEMBOURG

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

What was the asset allocation?

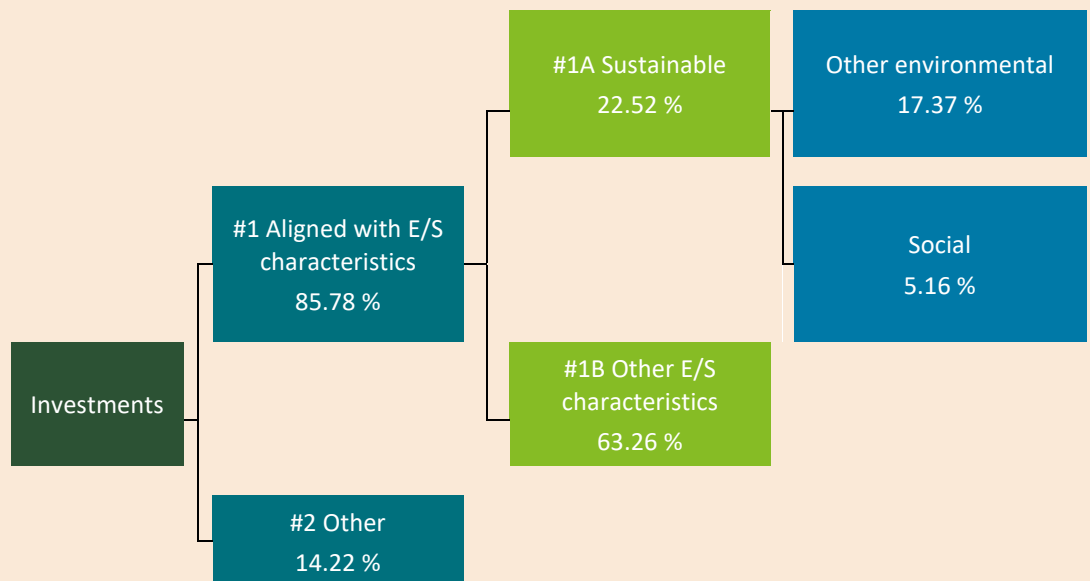

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 85.78 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 22.52 %, broken down into:
 - 5.16 % corresponding to socially sustainable investments.
 - 17.37 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Economic Sector	Sub-sector	Proportion

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 73.6% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.17% of the portfolio is aligned with the EU Taxonomy through transitional activities and 1.11% is aligned through enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

It does not apply as there is no previous periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 17.37 %.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 5.16 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 14.22 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but

that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.

- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="checkbox"/> <input type="checkbox"/> YES	<input checked="" type="checkbox"/> <input type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 78.1% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy. Specifically, during the reference period:

- The Sub-Fund has complied with the applicable Exclusion Policy excluding investments in companies that are exposed to controversial behaviour and controversial products. This means that the Sub-Fund had no exposure to excluded securities, taking into account a grace period.
- The Sub-Fund has avoided investment in companies that are in breach of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises. Companies in the portfolio that may have breached one of the international guidelines during the investment period, have become part of the Enhanced Engagement program of the Investment Manager. When engagement deemed highly unlikely to succeed, the company was excluded directly.
- The Sub-Fund's weighted carbon (scopes 1 and 2), water and waste footprint score were at least 20% better than that of the general market index.
- The Sub-Fund's weighted average ESG score was better than that of the general market index according to the Investment Manager's methodology.
- The Sub-Fund was limited to a maximum exposure of 2% to investments with an elevated sustainability risk based

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

on the market weight in the portfolio taking into account regional differences and benchmark (defined by the Investment Manager as companies with an ESG Risk Rating of 40 and higher). Each investment with an ESG Risk rating of higher than 40 required separate approval by a dedicated committee of SI specialists, compliance and risk management that oversees the bottom-up sustainability analysis.

- More than 75% of the holdings were covered by an ESG score.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of each of the environmental or social characteristics promoted by this financial product performed as follows. All values are based on the positions and available data as of 31 December 2023.

- Taking into account a grace period, the portfolio did not contain any investments that are on the Exclusion list as result of the application of the Investment Manager's Exclusion policy.
- 0 companies in portfolio are in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises and hence are a part of the Enhanced Engagement program.
- 0% of the holdings in portfolio had an elevated sustainability risk profile.
- The Sub-Fund's weighted score for the carbon, water and waste footprint were respectively 68.40%, 93.32% and 89.79% better than the general market index.
- The Sub-Fund's weighted average ESG score was 18.20 against 21.28 for the general market index.

● **... And compared to previous periods?**

The performance of the above-mentioned indicators compared to the previous reference period has been:

- Investment on exclusions indicator: it has remained 0% as reported in the previous reference period.
- Companies in violation of the ILO standards, UNGPs, UNGC or OECD Guidelines for Multinational Enterprises: it has remained 0 as reported in the previous reference period.
- Holdings with an elevated sustainability risk profile: it has remained 0% as reported in the previous reference period.
- Weighted score for:
 - Carbon footprint (% better than benchmark) at 68.40% in comparison as reported in the previous reference period, 74.63%.
 - Water footprint (% better than benchmark) at 93.32% in comparison as reported in the previous reference period, 90.69%.
 - Waste footprint (% better than benchmark) at 89.79% in comparison as reported in the previous reference period, 89.17%.
- Weighted average ESG Score was 18.20 in comparison as reported in the previous reference period, 17.66.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The Investment Manager used its proprietary SDG framework to determine if an investment qualified as sustainable investment.

The Investment Manager's SDG Framework is a tool that systematically assesses individual companies on key SDG targets and sector-specific indicators which help analysts determine a company's SDG contributions. These contributions aggregate into an overall SDG company score. The resulting scores are used to help construct portfolios that pursue positive impact, avoid negative impact, and support sustainable progress in the economy, society, and the natural environment. Positive scores imply that the investment does not significant harm any of the UN Sustainable Development goals.

The sustainable investments contributed to any or more of the UN Sustainable Development Goals, which include both social and environmental objectives. The Investment Manager used its proprietary SDG Framework to assess which investments constitute a sustainable investment as referred to in art 2(17) SFDR. Under the SDG Framework, "SDG scores" are calculated for each investment. Investments having positive SDG scores (+1, +2, +3) were deemed to contribute to the UN SDGs.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Alignment with the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact (PAI) were considered in the calculation of SDG scores under the Investment Manager's proprietary SDG Framework.

Violations with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights and Principal Adverse Impact lead to a negative SDG score. Only investments with a positive SDG score were classified as sustainable investment, indicating that such investments did no significant harm to any environmental or social sustainable investment objective. Minus scores show harm. Scores of -2 of -3 may even cause significant harm.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Sub-Fund considered principal adverse impacts of its investment decisions on sustainability factors as part of its investment due diligence process and procedures. For sustainable investments this meant ensuring that the investments do no significant harm to any environmental or social objective. Many PAI indicators were either directly or indirectly included in the SDG Framework to determine whether a company has significant impacts on the SDGs related to the PAI indicators.

The following PAIs were considered in the Sub-Fund:

- PAI 1 was considered for scope 1, 2 and 3 Green House Gas emissions via engagement and exclusions. The Investment Manager's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 2 was considered for scope 1 and 2 carbon footprint via engagement and exclusions. The Investment Manager's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 3 was considered for scope 1 and 2 Green House Gas intensity of investee companies via engagement and exclusions. The Investment Manager's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 4 regarding the exposure to companies in the fossil fuel sector was considered via engagement and exclusions. The Investment Manager's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal ($\geq 20\%$ of the revenues), oil sands ($\geq 10\%$ of the revenues) and arctic drilling ($\geq 5\%$ of the revenues)).
- PAI 5 regarding the share of energy consumption from non-renewable sources was considered via engagement and exclusions.
- PAI 6 regarding Energy consumption per High Impact Climate sector was considered via engagement and exclusions. The Investment Manager's Exclusion policy covers the exclusion of activities with highly negative climate impacts (e.g. thermal coal (Coal power expansion plans ≥ 300 MW)).
- PAI 7 regarding activities negatively affecting biodiversity sensitive areas was considered via engagement. For relevant sectors, biodiversity impact is considered in fundamental SI research analysis.
- PAI 8 regarding Water emissions was considered via engagement. Within the Investment Manager's Controversial Behaviour program, companies are screened on a potential violation in relation to water. When the Investment Manager deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 9 regarding hazardous waste and radioactive waste ratio was considered via engagement. In addition, within the Investment Manager's Controversial Behavior program, companies are screened on a potential violation in relation to waste. When the Investment Manager deems a company to cause significant negative impact on local water supply or waste issues which is a breach of UN Global Compact principle 7, it will either apply enhanced engagement or directly exclude the company from the universe.
- PAI 10 regarding violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises was considered via engagement and exclusions. The Investment Manager acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNG) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international standards to assess the behavior of companies. In order to mitigate severe breaches, an enhanced engagement process has been applied where the Investment Manager deemed a severe breach of these principles and guidelines has occurred. If this enhanced engagement, which may last up to a period of three years, does not lead to the desired change, the Investment Manager will exclude a company from its investment universe.
- PAI 11 regarding lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises was considered via engagement. The Investment Manager supports the human rights principles described in the Universal Declaration of Human Rights (UDHR) and detailed in the Guiding Principles on Business and Human Rights (UNGPs), the OECD Guidelines for Multinational Enterprises and the eight fundamental International Labour Organization (ILO) conventions. Our commitment to these principles means the Investment Manager will expect companies to formally commit to respect human rights, have in place human rights due diligence processes, and, where appropriate, ensure that victims of human rights abuses have access to remedy.
- PAI 12 regarding unadjusted gender pay-gap was considered via engagement. In 2022, the Investment Manager launched an engagement program on diversity and inclusion, which will include elements in relation to the gender pay gap. Overall, gender pay gap disclosures are only mandatory in few jurisdictions

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

(e.g. UK, California). Companies are encouraged to improve such disclosures.

- PAI 13 regarding board gender diversity was considered via engagement. In 2022, the Investment Manager launched an engagement program on diversity and inclusion, which will include elements in relation to equal pay.
- PAI 14 regarding exposure to controversial weapons was considered via exclusions. For all strategies the Investment Manager deems anti-personnel mines, cluster munitions, chemical, biological weapons, white phosphorus, depleted uranium weapons and nuclear weapons that are tailor made and essential, to be controversial weapons. Exclusion is applied to companies that are manufacturers of certain products that do not comply with the following treaties or legal bans on controversial weapons: 1. The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines. 2. The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions. 3. The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons. 4. Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 5. The Treaty on the Non-Proliferation of Nuclear Weapons (1968) which limits the spread of nuclear weapons to the group of so-called Nuclear Weapons States (USA, Russia, UK, France and China). 6. The Dutch act on Financial Supervision 'Besluit marktmisbruik' art. 21 a. 7. The Belgian Loi Mahoux, the ban on uranium weapons. 8. Council Regulation (EU) 2018/1542 of 15 October 2018 concerning restrictive measures against the proliferation and use of chemical weapons.
- PAI 4 regarding investments in companies without carbon emission reduction initiatives was considered via engagement. The Investment Manager engaged with key high emitters in our investment portfolios via the engagement themes "Acceleration to Paris" and "Net Zero Carbon Emissions".
- PAI 5 regarding the share of investments in investee companies without any grievance or complaints handling mechanism was considered.
- PAI 6 regarding insufficient whistleblower protection was considered.
- PAI 7 regarding incidents of discrimination was considered.
- PAI 8 regarding excessive CEO pay ratio was considered via engagement under the engagement program "Responsible Executive Remuneration".

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via both the Investment Manager's Exclusion Policy and the Investment Manager's SDG Framework. The Investment Manager's SDG Framework screens for breaches on these principles in the final step of the framework. In this step, the Investment Manager checks whether the company concerned has been involved in any controversies. Involvement in any controversy will result in a negative SDG score for the company, meaning it is not a sustainable investment.

The Investment Manager's Exclusion Policy includes an explanation of how the Investment Manager acts in accordance with the International Labor Organization (ILO) standards, United Nations Guiding Principles (UNGPs), United Nations Global Compact (UNGC) Principles and the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and is guided by these international treaties to assess the behaviour of companies. The Investment Manager continuously screened its investments for breaches of these principles. In the reported year, there have been no breaches.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI were considered both pre-investment (through exclusions and through integration in the investment due diligence) and post-investments (through engagement). All values are based on the average positions over the reporting period.

Pre-investment, the following principal adverse impacts on sustainability factors were considered:

- Via the applied normative and activity-based exclusions, the following PAIs were considered:
 - Exposure to companies active in the fossil fuel sector (PAI 4).
 - Exposure to companies in violations of the UN Global Compact Principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10).

- The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7).
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons) (PAI 14).
- Via the ESG integration process, as part of the investment due diligence policies and procedures, the following PAIs were considered:
 - The greenhouse gas emissions scope 1 and 2 (PAI 1).
 - The carbon footprint of the portfolio (PAI 2).
 - The greenhouse gas intensity of the portfolio (PAI 3).
 - Exposure to companies active in the fossil fuel sector (PAI 4).
 - The share of non-renewable energy consumption of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5).
 - The share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources (PAI 5).
 - The energy consumption per million EUR of revenue of investee companies, per high-impact climate sector (PAI 6).
 - The share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement (PAI 4).

The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7).

- The emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (PAI 8).
- The generation of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average.
- The average ratio of female to male board members in investee companies expressed as a percentage of all board members (PAI 13).
- Via the environmental footprint performance targets of the Sub-fund, the following PAIs were considered:
 - The carbon footprint of the portfolio (PAI 2).
 - The share of investments in investee companies with sites/operations located in or near biodiversity sensitive areas where activities of those investee companies negatively affect those areas (PAI 7).
 - The emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (PAI 8).
 - The generation of hazardous waste and radioactive waste generated by investee companies per million EUR invested.

Post-investment, the following principal adverse impacts on sustainability factors are taken into account:

- Via the Investment Manager's entity engagement program, the following PAIs are considered:
 - Via the Investment Manager's Entity Engagement program, the following numbers of engagement cases per PAI were active on portfolio holdings, during the reporting period: PAI 1: GHG emissions 2 cases. PAI 2: Carbon footprint 2 cases. PAI 3: GHG intensity of investee companies 2 cases. PAI 4: Exposure to companies active in the fossil fuel sector 2 cases. PAI 5: Share of non-renewable energy consumption and production 2 cases. PAI 6: Energy consumption intensity per high impact climate sector 2 cases. PAI 7: Activities negatively affecting biodiversity sensitive areas 4 cases. PAI 8: Emissions to water 2 cases. PAI 9: Hazardous waste and radioactive waste ratio 2 cases. PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 2 cases. PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises 2 cases. PAI 12: Unadjusted gender pay gap 4 cases. PAI 13: Board gender diversity 4 cases. PAI 14: Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) 2 cases.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2023-31/12/2023

Largest investments	Sector	% Assets	Country
MICROSOFT CORP COMMON STOCK USD 0.00000625	Software	5.87%	UNITED STATES

The top investments in the above table have been presented as a snapshot at 31 December 2022.

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 75% as described below.

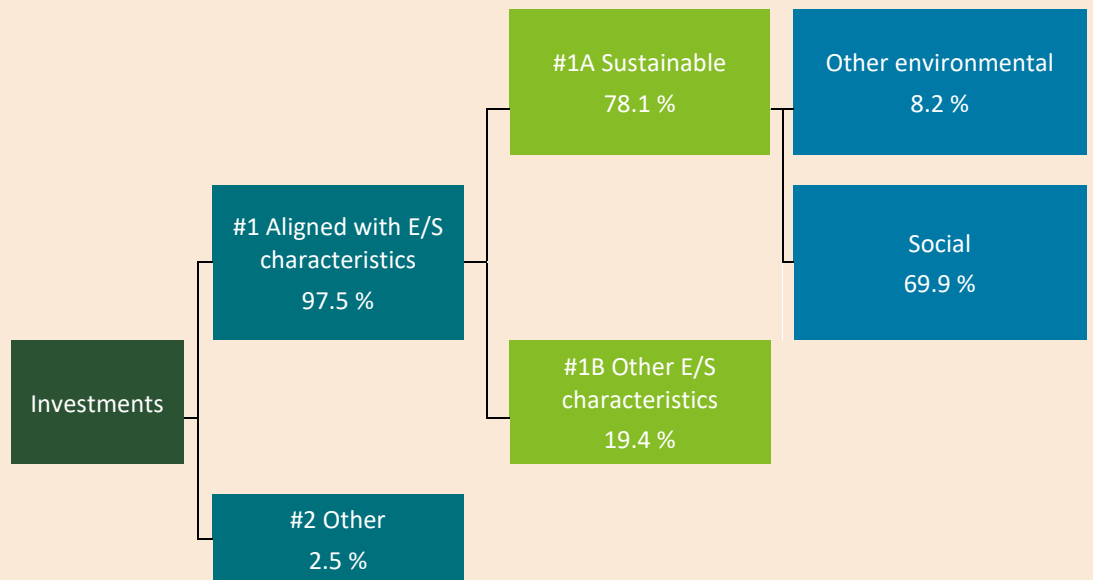

What was the asset allocation?

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 75% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. As of the 31st of December 2023, this value was 97.5 %.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. As of the 31st of December 2023, the percentage of sustainable investments of this Sub-Fund was 78.1 %, broken down into:
 - 69.9 % corresponding to socially sustainable investments.
 - 8.2 % corresponding to environmental investments other than Taxonomy.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 0.69 % is aligned through enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The percentage of investments aligned with the EU Taxonomy compared to the previous reference period has increased, from 0.66 % to 1.02 %.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

8.2 %. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDG's: SDG 12 (responsible consumption and production), 13 (climate action), 14 (life below water) or 15 (life on land).

 **What was the share of socially sustainable investments?**

69.9 %. This concerns investments with a positive score on one of more of the following SDGs, without harming other SDGs: SDG 1 (No poverty), 2 (zero hunger), 3 (good health and well-being), 4 (quality education), 5 (gender equality), 6 (clean water and sanitation), 7 (affordable and clean energy), 8 (decent work and economic growth), 9 (industry, innovation and infrastructure), 10 (reduced inequalities), 11 (sustainable cities and communities), 16 (peace justice and strong institutions) or 17 (partnerships for the goals).

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Amongst others, the use of cash, cash equivalents and derivatives is included under "#2 Other". The mandate may make use of derivatives for hedging, liquidity and efficient portfolio management as well as investment purposes (in line with the investment policy). Any derivatives in the mandate were not used to attain environmental or social characteristics promoted by the financial product.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, the overall sustainability profile of the fund was improved further by focusing on material information with regards to Environmental, Social and Governance factors. Furthermore, we have over half of our holdings under active engagement either within Robeco's thematic engagement programs or under more company-specific engagement topics related to Environmental, Social and/or Governance issues. In addition, the environmental profile of the fund in terms of water use, waste generation and greenhouse gas emissions of the fund remained well below that of the benchmark. The fund has an environmental profile that is more than 60% better than the benchmark average.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 25.43% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 80.1 %.

● **... And compared to previous periods?**

It does not apply as there is no previous periodic report.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 12/05/2023-31/12/2023

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

What was the asset allocation?

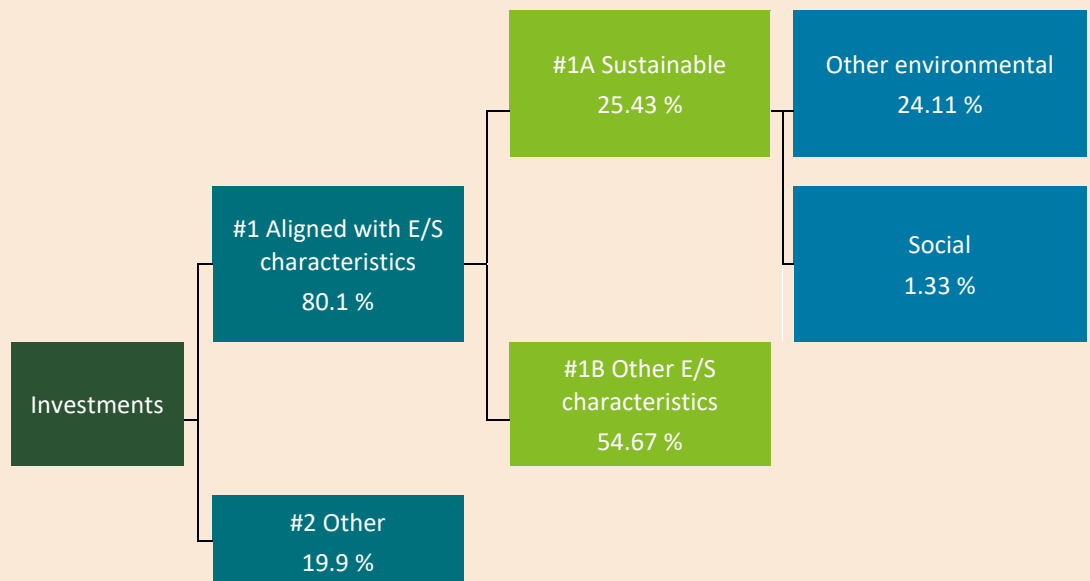

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 80.1 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 1% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 25.43 %, broken down into:
 - 1.33 % corresponding to socially sustainable investments.
 - 24.11 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Economic Sector	Sub-sector	Proportion
Commercial Banks		67.43%
	Diversified Banks	89.99%
	Regional Banks	10.01%
Other		13.06%
	Other	100.00%
Capital Markets		11.21%
	Banks	100.00%
Financial Services		7.37%
	Diversified Financial Services	56.35%
	Commercial & Residential Mortgage Finance	26.76%
	Specialized Finance	16.89%
Insurance		0.92%
	Life & Health Insurance	100.00%
Sovereigns		0.00%
	Sovereign	100.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 0 % is aligned through enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

It does not apply as there is no previous periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 24.11 %.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 1.33 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 19.9 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but

that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.

- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

SANTANDER LATIN AMERICAN INVESTMENT GRADE ESG BOND

Entity LEI: 2221005XUWXMGGGB3M32

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> YES	<input type="radio"/> <input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39.64% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund’s investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer’s quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer’s management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining production, more than 25% revenues derived from coal power generation production, more than 30% revenues derived from unconventional fossil fuels, more than 15% revenues derived from conventional weapons production, 0% revenues derived from controversial weapons, 0% revenues derived from tobacco production and/or 15% revenues derived from tobacco participation. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- ESG Rating at the issuer level: based on the above-mentioned methodology, the ESG Rating of each issuer has been periodically monitored and those issuers with the best ESG rating were selected (better than the benchmark, J.P. Morgan CEMBI Broad Diversified Latin America IG Index, defined in the Sub-Fund's prospectus).
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 91.23 %.

● **... And compared to previous periods?**

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as reported in the previous reference period.
- Controversy indicator: it has remained 0% as reported in the previous reference period.
- Average ESG rating of the Sub-Fund: the Investment Manager has reviewed the average ESG rating reported for 2022 to A- (2021: A-).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed

to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.

- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer’s relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds’ PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2023-31/12/2023

Largest investments	Sector	% Assets	Country

The top investments in the above table have been presented as a snapshot at 31 December 2022.

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 75% as described below.

What was the asset allocation?

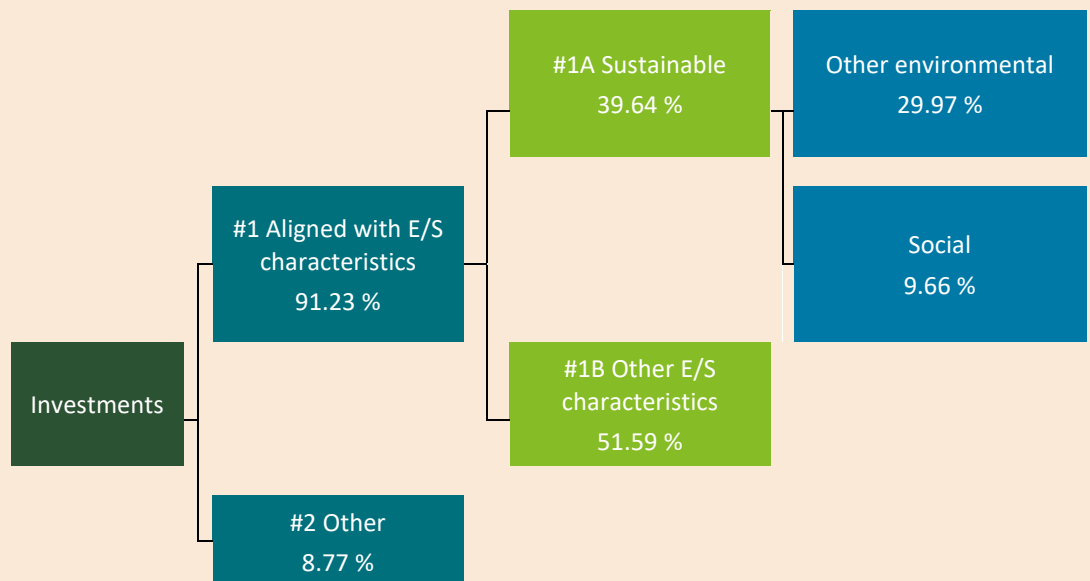

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 75% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 91.23 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 5% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 39.64 %, broken down into:
 - 9.66 % corresponding to socially sustainable investments.
 - 29.97 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.08 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 0.02 % is aligned through enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The percentage of investments aligned with the EU Taxonomy compared to the previous reference period has increased, from 0.47 % to 1.16 %.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 29.97 %.

 **What was the share of socially sustainable investments?**

The financial product had a share of investments with a social objective of 9.66 %.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The financial product had a 8.77 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.

- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.
- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective**: ___%

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 26.04% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 95.6 %.

● **... And compared to previous periods?**

It does not apply as there is no previous periodic report.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 12/05/2023-31/12/2023

Largest investments	Sector	% Assets	Country
L&G CYBER SECURITY UCITS ETF ETP GBP	Third-party fund	4.11%	IRELAND

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

What was the asset allocation?

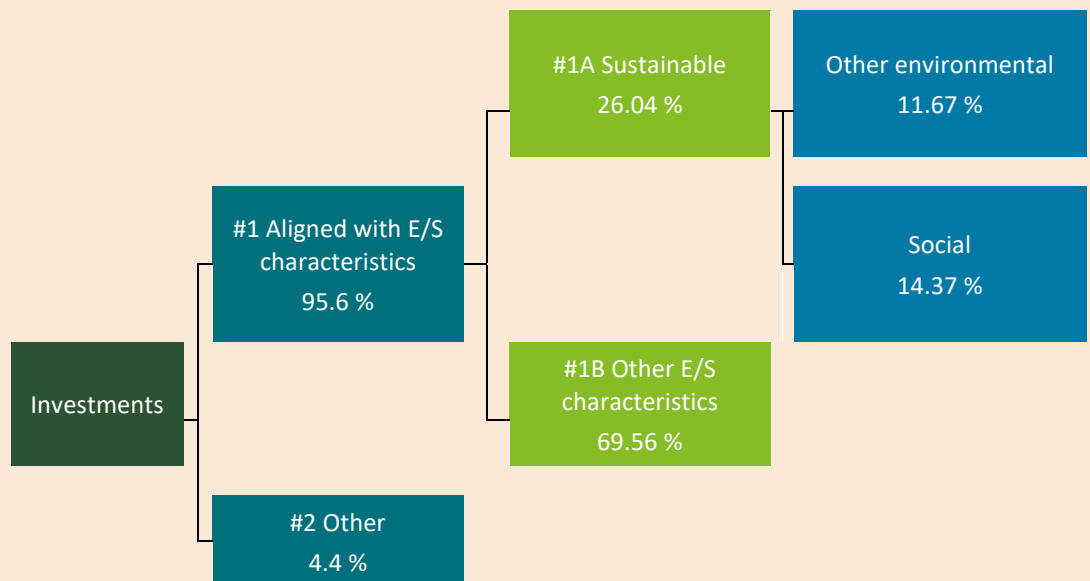

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 95.6 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 26.04 %, broken down into:
 - 14.37 % corresponding to socially sustainable investments.
 - 11.67 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Economic Sector	Sub-sector	Proportion
Third-party fund		92.57%
	Mutual Fund	68.61%
	Exchange Trade Fund	31.39%
Capital Markets		4.98%
	Asset Management & Custody Banks	100.00%
Other		2.45%
	Other	100.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.06 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 2.5 % is aligned through enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

It does not apply as there is no previous periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 11.67 %.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 14.37 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 4.4 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but

that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.

- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: 0%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective**: 95.09%

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investment
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It **promoted E/S characteristics, but did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Sub-Fund complied with its social sustainable investment objective by only investing in companies whose activities are grouped around three themes: Health & Wellness, Education & Financial Inclusion, and Food & Nutrition. These three major societal challenges in which the Sub-Fund has invested have been mainly focused on the following UN Sustainable Development Goals (SDGs): No Poverty, Good health and Wellbeing, Quality education, Gender equality, Decent work and economic growth, and Reduced inequalities.

Specifically, the Sub-Fund has met its objective by investing in companies that improve our society by obtaining at least 30% of their revenues from activities related to the above-mentioned SDGs. These companies also qualify as social sustainable investment as they did not cause any significant harm to any other sustainable objective and followed good governance practices.

The remaining investments that did not qualify as social sustainable investments have not altered the achievement of the Sub-Fund's objective, and their purpose was to provide liquidity to the portfolio and hedging for the efficient management of interest rate, currency, and credit risks.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to issuers whose activity is related to controversial weapons, armament, tobacco, coal mining, coal-based power generation and fossil fuels based on turnover data.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Percentage of revenues aligned with the Sub-Fund themes indicator: the Sub-Fund has invested in companies that have had at least 30% of its revenues related to the SDGs based on the information provided by the Investment Manager's ESG data provider based on the analysis of issuers' operations, products, services, policies, and practices and their net contribution – positive and adverse – to addressing the Sub-Funds social themes or that, according to the Investment Manager's assessment, have provided a relevant contribution to solve the above described societal challenges, that could be reinforced by the Investment Manager's engagement with the relevant companies.

● **... And Compared to Previous Periods?**

The performance of the above-mentioned indicators has not changed in comparison with the previous reference period. Specifically:

- Exclusions indicator: it has remained 0% as reported in the previous reference period.
- Controversy indicator: it has remained 0% as reported in the previous reference period.
- Percentage of revenues aligned with the Sub-Fund themes indicator: it has remained 30% as reported in the previous reference period.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

To ensure that the positive contribution to the social objective of the Sub-Fund did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements. This ESG rating combines quantitative and qualitative criteria in a positive and/or negative sense in order to obtain a clear and complete view of each asset in its overall performance in the ESG area, generating an ESG rating within each type of issuer.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with any exposure to fossil fuels production, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

If any of the thresholds was not met, the Investment Manager considered that the investment is causing an adverse impact and the DNSH principle is not ensured. Therefore, the issuer was not considered as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines. During the reference period, this Sub-Fund did not invest in any issuer violating these international guidelines.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer's relative industry performance to identify those companies with the worst performance in each PAIS indicator. Those issuers with the worst performance in its sector for all the mandatory PAIS indicators have been excluded from this Sub-Fund.
- Based on the comparison of the Sub-Funds' PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/01/2023-31/12/2023

The top investments in the above table have been presented as a snapshot at 31 December 2022.

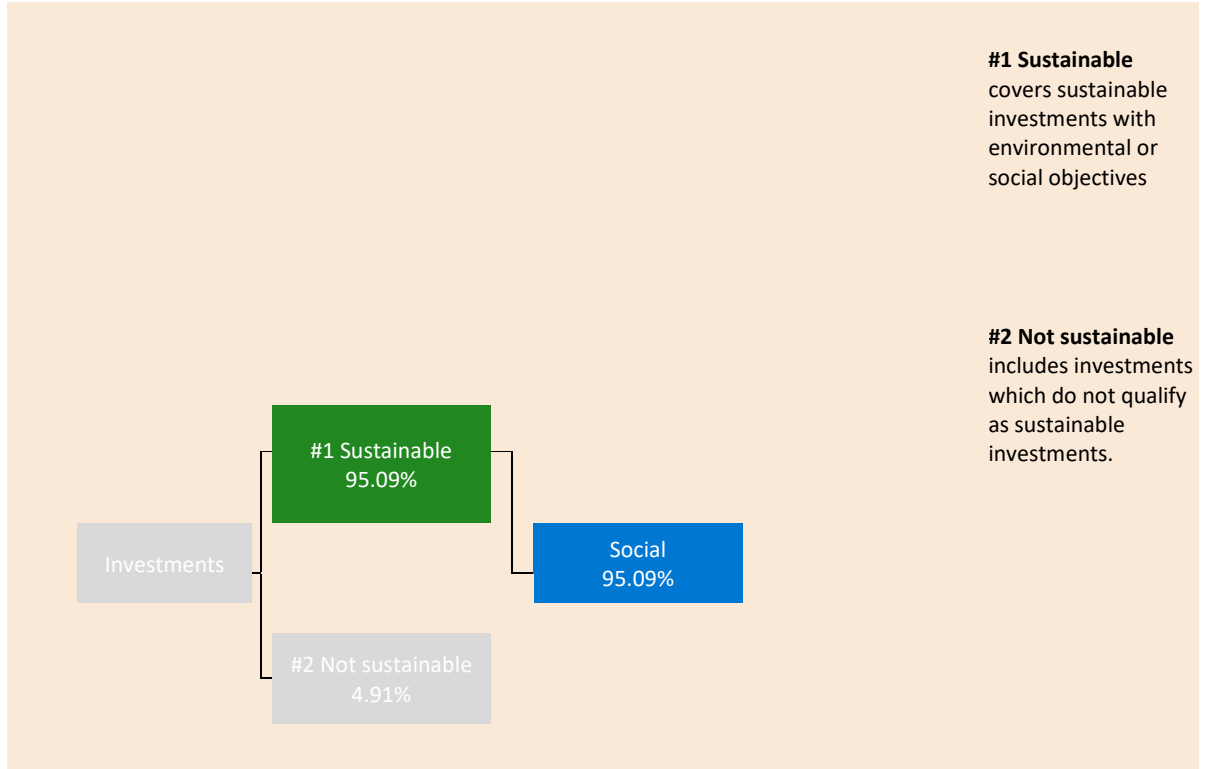

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments is at least 70%.

- **What was the asset allocation?**

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically, it meets the minimum of 70% sustainable investment, which fully corresponds to socially sustainable investments. The percentage of socially sustainable investment of this Sub-Fund is 95.09% of the total of the Sub-Fund. This percentage has been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Asset allocation describes the share of investments in specific assets.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 0.58 % is aligned through enabling activities.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The percentage of investments aligned with the EU Taxonomy compared to the previous reference period has increased, from 0.6% to 3.05%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?

The Sub-Fund did not make any sustainable investments with an environmental objective.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 95.09%.

What investments were included under “#2 Not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund had an average 4.91% share of investments which did not qualify as sustainable investments throughout the reference period. These investments included in “#2 Not sustainable” have not altered the achievement of the Sub-Fund’s sustainable investment objective, and their purpose is to provide liquidity to the portfolio and hedging for the efficient management of interest rate, currency, and credit risks.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the following actions have been taken to attain the sustainable investment objective of the Sub-Fund:

- The Investment Manager has defined the socially sustainable investable universe of the Sub-Fund by periodically selecting companies whose business intend to generate positive social outcomes and contribute to the Sub-Fund’s themes: Health & Wellness, Education & Financial Inclusion, and Food & Nutrition. In this sense, the Investment Manager has reviewed that each eligible company have had at least 30% of its revenues related to the SDGs associated with the Sub-Fund themes, or that according to the Investment Manager’s assessment, provide a relevant contribution to solve the Sub-Funds’ themes.
- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, armament, tobacco, coal mining, coal-based power generation and fossil fuels have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund’s investment universe.
 - Issuers whose activities may have caused significant adverse impacts on sustainability factors according to the Investment Manager’s methodology that have not been mitigated by applying engagement actions have been excluded.
 - Issuers that have a poor governance performance in accordance with the Investment Manager’s ESG score methodology have been excluded to guarantee adequate governance practices.

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager’s Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager’s SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

The Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the sustainable objective of the Sub-fund and with the Investment Manager’s applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company’s Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

At last, the Management Company has delivered quarterly reports where further details on the Sub-Fund's compliance with its societal challenges was disclosed and it can be found at <https://www.santanderassetmanagement.com/individual-investor/flagship-strategies/santander-prosperity>.

How did this financial product perform compared to the reference sustainable benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective**: ___%

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.42% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: As of September 2023, the exclusion indicator was reported as 0%, but in December 2023 was raised to 0,98% due the change of the exposure to unconventional fossil fuels for one investment held by the fund. This change was caused by a data modification carried out by the data provider. The exclusions considered in the Sub-Fund's strategy are exposure to companies with more than 25% revenues derived from coal mining, more than 25% revenues derived from coal power generation, more than 30% revenues derived from unconventional fossil fuels, more than 15% revenues derived from conventional weapons, 0% revenues derived from controversial weapons and/or 0% revenues derived from tobacco production. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- ESG Rating at the issuer level: based on the above-mentioned methodology, the ESG Rating of each issuer has been periodically monitored and those issuers with the best ESG rating were selected (above the 20th percentile in its relative rating with respect to sector and region).
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 89.4 %.

● **... And compared to previous periods?**

It does not apply as there is no previous periodic report.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of

the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association (“ICMA”).

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund has taken into account the principal adverse impacts on sustainability factors when making investment decisions. To this end, the Investment Manager has monitored the indicators in Table 1 and two of the optional indicators in Tables 2 and 3 of the RTS, to assess the adverse impacts that investments made by this Sub-Fund may cause.

During the reference period, the Investment Manager has identified these impacts at two levels:

- Based on each issuer’s relative industry performance to identify those companies with the worst performance in each PAIS indicator. In this sense, issuers with worse performance compared to their sector for all mandatory PAIS indicators have been evaluated by the SRI team according to the relevance of the impact and recurrence over time, and may have derived, for example, in engagement actions.
- Based on the comparison of the Sub-Funds’ PAIS indicators performance with those of a reference index (benchmark). When the performance of the Sub-Fund has been worse than the benchmark, the Investment Manager has analysed the severity of the impact, recurrence over time, likelihood of success through engagement actions, portfolio exposure, and PAIS indicator typology to implement engagement actions. During the reference period, these engagement actions have been prioritised for indicators related to Greenhouse Gas Emissions as well as for issuers in risk of breaching the UN Global Compact principles. Additionally, the Investment Manager has also mitigated those impacts by adjusting the positions that contribute most to the PAIS indicator with worse performance against its benchmark, limiting the position increase or ultimately divesting.

The data required for the consideration of the PAI indicators have been provided by external data providers. A regular analysis of data coverage and quality has been carried out, in collaboration with data issuers and providers, to address the limitations on the availability and quality of data in the indicators.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 05/07/2023-31/12/2023

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 70% as described below.

What was the asset allocation?

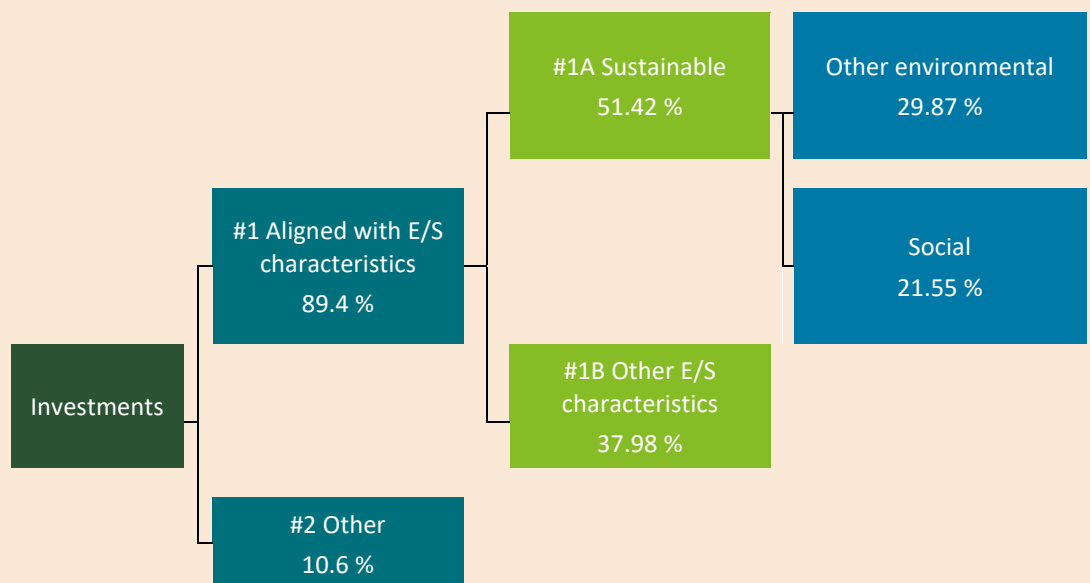

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 70% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 89.4 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 51.42 %, broken down into:
 - 21.55 % corresponding to socially sustainable investments.
 - 29.87 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

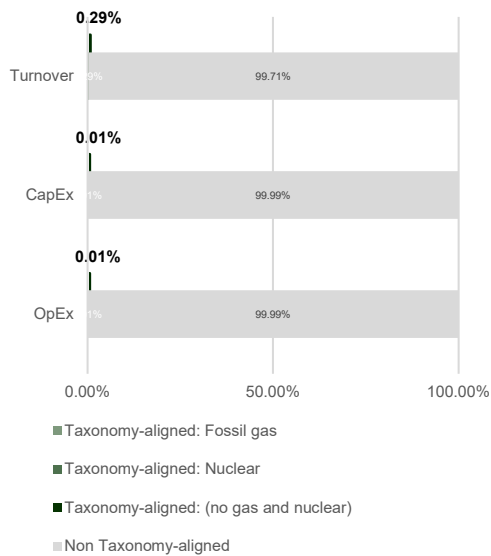

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

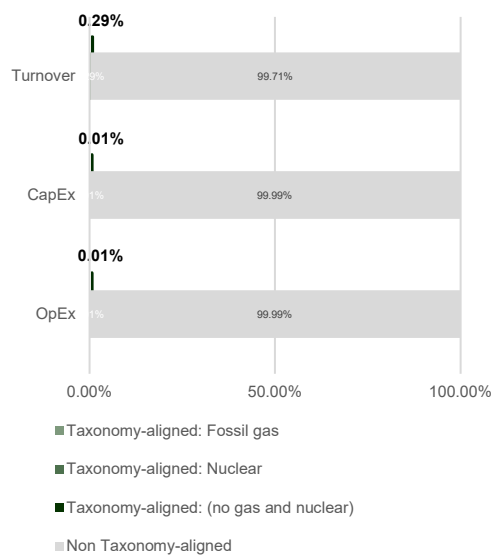

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.01% of the portfolio is aligned with the EU Taxonomy through transitional activities and 0.06% is aligned through enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

It does not apply as there is no previous periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 29.87 %.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 21.55 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 10.6 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but

that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.

- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 51.15% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund has promoted environmental and social characteristics by evaluating its underlying investments against environmental, social, and governance (ESG) criteria using a proprietary ESG methodology and investing in issuers that exhibit sound ESG practices and comply with the exclusion factors described in the Sub-Fund's investment strategy.

In this sense, financial, environmental, social, and good governance elements have been used to obtain a more complete view of the assets in which the Sub-Fund invested during the reference period, having evaluated a combination of ESG factors that included but were not limited to:

- Environmental factors analysed included the evaluation of an issuer's quantitative and qualitative performance in environmental topics such as greenhouse gas emissions, resource depletion, pollution, and water management.
- Social factors covered issues related to society and varied from workplace-related issues, labour standards or talent management, to relations with local communities, privacy and data security, and human rights.
- Governance factors analysed included the quality of an issuer's management, its culture and ethics, the effectiveness of governance systems to minimize the risk of mismanagement and their capacity to anticipate operational and legal risks that could have represented potential non-compliance. It also included factors related to the board composition and structure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The evaluation of these factors was based on the sectorial materiality defined by the Investment Manager as part of its ESG methodology. In addition to this, controversy cases were also assessed for the severity of its impact on society, the environment and stakeholders' interest and consequently scored and integrated within the Investment Manager's ESG methodology.

The Investment Manager also promoted environmental and social characteristics by actively engaging with issuers, either individually or through collaborative initiatives, to promote best ESG practices as defined in its engagement policy.

● **How did the sustainability indicators perform?**

The performance of the Sub-Fund's sustainability indicators throughout the reference period is described below:

- Exclusions indicator: the Sub-Fund did not contain any investments in sectors not permitted by the Sub-Fund's investment policy. That is to say, the Sub-Fund had 0% exposure to companies with more than 25% revenues derived from coal mining, coal power generation and companies whose business is mainly focused on controversial weapons. In addition to this, for the case of public fixed income, the Sub-Fund had 0% exposure to countries with poor performance in terms of political rights and social freedoms based on the Democracy Index indicator and Freedom in the World study.
- Controversy indicator: the Sub-Fund had 0% exposure to companies that were involved in controversies considered critical.
- Average ESG rating of the Sub-Fund: the average ESG rating of the assets rated in the Sub-Fund according to the Investment Manager's internal methodology was A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance). This value was calculated as the average ESG rating of the underlying assets of portfolio with ESG rating considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- Percentage of assets in the Sub-Fund aligned with the environmental and social characteristics promoted was 98.35 %.

● **... And compared to previous periods?**

It does not apply as there is no previous periodic report.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investment objectives of this Sub-Fund were attained by investing in issuers that contributed to at least one of objectives defined in the pre-contractual disclosure of this Sub-Fund. In practice, the issuers that have been accounted as part of the sustainable investment percentage reported, have met at least one of the following criteria:

- Issuers whose activities are aligned with the decarbonization path of the Paris Agreement or are currently net zero. Issuers that qualified under this criterion contributed to attain environmentally sustainable objectives such as climate change mitigation by helping to stabilize greenhouse gas concentrations in the atmosphere under the Paris Agreement and/ or adaptation to climate change by investing in adaptation solutions that substantially reduce or prevent the risk of adverse climate effects.
- Issuers whose practices have at least 20% of their revenues aligned with the mitigation and/or adaptation objectives in accordance with the EU Taxonomy. As of the date of this report, the contribution to sustainable objectives of the issuers that qualify under this criterion were considered to contribute to the environmental objectives of climate change mitigation and/or adaptation as described above.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable environmental impact (i.e., a company that develops sustainable agriculture practices, pollution prevention technologies, or alternative energy, among others). Issuers that qualified under this criterion have been considered as contributors to environmentally sustainable objectives such as pollution prevention and control, protection and recovery of biodiversity and ecosystems and sustainable use and protection of water and marine resources.
- Issuers that generate at least 20% in terms of turnover from products and/or services that generate a measurable social impact (i.e., a company that develops education solutions, connectivity enhancement and improvements or disease treatment solutions, among others). Issuers that fell under this criterion contributed to social sustainable objective such as adequate living standards and consumer welfare by contributing to the creation of products and services that meet human needs.
- Issuers whose corporate practices demonstrated an intention to contribute to the Sub-Fund's environmental and/or social sustainable objectives through its leading sustainability performance based on the ESG score of the Investment Manager.

Investments made by the Sub-Fund in green bonds, social bonds, and sustainable bonds were also considered as contributors to the environmental or social sustainability objectives of the Sub-Fund by financing green, social or sustainable projects in accordance with reference standards such as those developed by the International Capital Market Association ("ICMA").

When the Sub-Fund invested in other UCITS/UCI, the Investment Manager used the sustainable investment data and methods disclosed by the asset manager of the invested funds.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that the positive contribution to an environmental or social sustainable investment objective did not cause significantly harm to other sustainable objectives throughout the reference period, the Investment Manager applied the following safeguards based on its internal methodology with the aim of demonstrating that there is an intention not to cause such harm:

- Consideration of the principal adverse impact indicators (PAIS) listed in Annex I to Delegated Regulation (EU) 2022/1288 implementing Regulation (EU) 2019/2088 on Disclosure (SFDR) ('RTS') as described in the following question.
- Activity in controversial sectors: Significant exposures to controversial activities have been analysed and excluded in sectors such as fossil fuels, controversial weapons, tobacco, among others, as well as investments exposed to severe controversies.
- Neutral sustainable performance: A minimum ESG rating (B) according to the Investment Manager's internal methodology on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance) has been required to ensure that each issuer's sustainability practices meet minimum ESG requirements.

If an investment has failed to comply with any of these safeguards, the Investment Manager has considered that it is not possible to guarantee that there is no significant harm, and it has not been considered a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager has taken into account all the mandatory principal adverse impact indicators (PAIS) in the analysis of the principle of not causing significant harm (DNSH).

For doing so, the Investment Manager has defined relevant thresholds based on quantitative and qualitative technical criteria. The thresholds have been:

- Absolute thresholds: Issuers with significant exposure to fossil fuels, activities affecting biodiversity-sensitive areas, violating UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, lacking processes and compliance mechanisms to monitor compliance with those international standards, and/or exposed to controversial weapons were considered not compliant with the DNSH principle.
- Industry-level thresholds: Issuers that are within the worst performing threshold of their industry in terms of greenhouse gas emissions, water, waste and/or social and employee matters were considered not compliant with the DNSH principle.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Respect for good business practices and human rights is an integral part of the Investment Manager's values and a minimum performance standard to carry out its activities in a legitimate manner.

In this regard, the Investment Manager's actions are based on the principles set in the OECD Guidelines for Multinational Companies and the ten principles of the United Nations Global Compact, among others. This commitment is reflected both in Santander Group's corporate policies and in the Investment Manager's own policies and is part of the Investment Manager's internal sustainability risk integration procedure.

The Investment Manager has regularly monitored whether the investments fail to comply with any of these international guidelines and, in the event of non-compliance, acted in accordance with the relevant event, adopting measures of engagement when required.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors within its investment process. The Investment Manager considered that the investment strategy of the Sub-Fund did not allow for a full integration of the PAI indicators as it expects to hold the underlying bonds to maturity, limiting the potential mitigating actions derived. However, the Sub-Fund used the mandatory PAI indicators as part of the Do Not Significant Harm screen to demonstrate that an investment qualifies as Sustainable Investment as previously explained in this report.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 06/11/2023-31/12/2023

Largest investments	Sector	% Assets	Country
BANCO SANTANDER SA MEDIUM TERM NOTE FIXED 3.75%	Commercial Banks	3.10%	SPAIN

What was the proportion of sustainability-related investments?

The proportion of investments related to sustainability is at least 51% as described below.

What was the asset allocation?

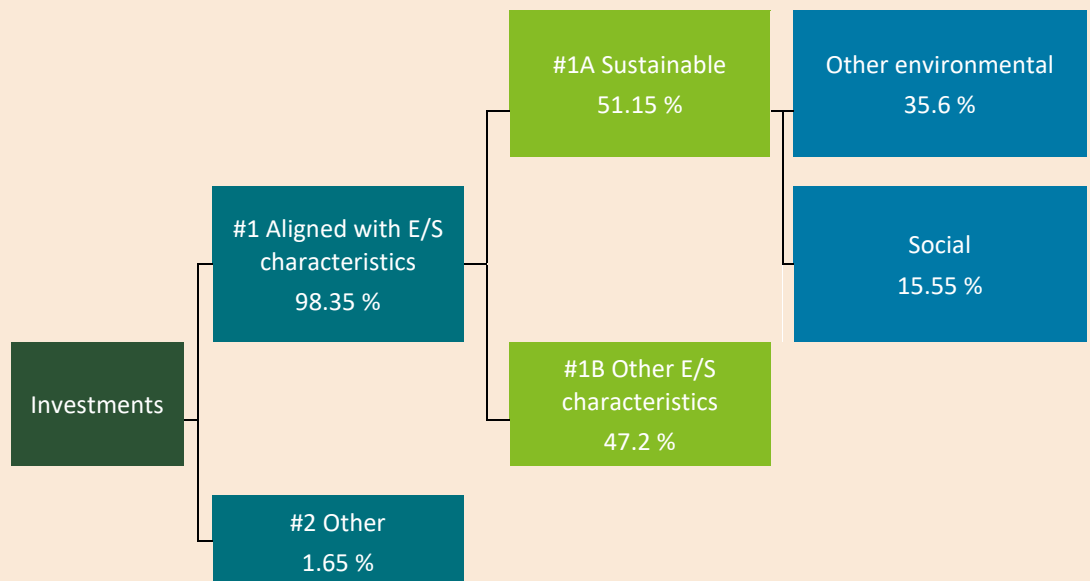

The Sub-Fund has complied with the allocation of assets provided in the pre-contractual information. Specifically:

- The Sub-Fund has met the minimum of 51% of the Sub-Fund's that promote environmental and social characteristics by meeting the above-described ESG investment strategy. Throughout the reference period, this percentage has been 98.35 % calculated as the average percentage of assets that promoted the characteristics of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.
- The Sub-Fund has met the minimum commitment of 10% in sustainable investments. Throughout the reference period, the average percentage of sustainable investments of this Sub-Fund has been 51.15 %, broken down into:
 - 15.55 % corresponding to socially sustainable investments.
 - 35.6 % corresponding to environmental investments other than Taxonomy.

The above percentages have been calculated as the average percentage of sustainable investments of the Sub-Fund considering the data from the last business day of each quarter of the reference period as defined in the Top Investments section.

Please note that, for the sake of clarity, the percentages related to Sustainable Investments (#1A) and other E/S characteristics (#1B) are calculated based on the total investments and not only on those aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Economic Sector	Sub-sector	Proportion

	Pharmaceuticals	100.00%
Gas Utilities		0.99%
	Gas Utilities	100.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The Sub-Fund does not have a minimum percentage of alignment of its investments with the EU Taxonomy. The following charts show the alignment of the portfolio with the EU Taxonomy as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ¹?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

0.37 % of the portfolio is aligned with the EU Taxonomy through transitional activities and 3.2 % is aligned through enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

It does not apply as there is no previous periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The financial product had a share of investments with an environmental objective not aligned with the EU taxonomy of 35.6 %.

What was the share of socially sustainable investments?

The financial product had a share of investments with a social objective of 15.55 %.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product had a 1.65 % share of investments which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. This percentage was calculated as the average percentage of the Sub-Fund considering the underlying investments from the last business day of each quarter of the reference period as defined in the Top Investments section.

These investments did not alter the achievement of the environmental or social characteristics promoted by the Sub-Fund, and their purpose was investment, contributing to efficient portfolio management, providing liquidity and hedging.

The Investment Manager has established minimum environmental or social safeguards so as not to cause significant damage, such as consideration of the principal adverse impacts, or the exclusion of activities that are not aligned with the environmental and/or social characteristics of the Fund. The assets that could be considered were the following:

- Direct cash investment assets that did not have an ESG rating/rating due to the lack of supplier data used by the Investment Manager and which cannot be considered sustainable investments in accordance with the criterion defined in the previous section (i.e., green, social bonds, etc.).
- Investment funds that did not have an ESG rating/rating due to lack of data and that cannot be classified as an investment Sub-Fund art. 8 or 9 according to SFDR.
- Other cash assets other than those mentioned above. (i.e., ETC, etc.) that are permitted by the Sub-Fund's policy and do not harm its ESG profile.
- Liquidity at the depositary and other current accounts used for the ordinary operation of the Sub-Fund (i.e., derivative guarantees, etc.).

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the following actions have been taken to meet the environmental and social characteristics of the Sub-Fund:

- The Investment Manager has periodically reviewed that the Sub-Fund complies with the following exclusions:
 - Issuers that had any business activities (measured in terms of turnover) related to controversial weapons, and/or a significant revenue derived from non-conventional fossil fuels and/or coal-mining power generation activities have been excluded.
 - Issuers involved in controversies considered critical, have been excluded from the Sub-Fund's investment universe.
 - Public fixed income issuers were assessed to exclude those that were low performers in relation to political rights and social freedom. For doing so, the Investment Manager based its analysis on either of the following two indicators:
 - Democracy Index: Indicator that determines the range of democracy in 167 countries based on measurements such as the electoral process and pluralism, civil liberties, governance, political participation and political culture. On a scale of 1 to 10 points, countries below 6 points and corresponding to hybrid and authoritative regimes were excluded.
 - Freedom in the World study: Indicator measuring the degree of democracy and political freedom in all countries and in the most important disputed territories worldwide on a scale of 3 levels (“non-free”, “partially free” and “free”), having excluded countries classified as “non-free”.
- The Investment Manager has periodically monitored that the average minimum ESG rating/rating criterion of issuers of the direct cash investment portfolio assets and the rated IIC has been met, in accordance with the Investment Manager's own methodology in analysing those underlying assets, as at least A- on a 7-level scale (C-, C, C+, B, A-, A and A+, where A+ reflects the best ESG performance).

Investments that complied with the criteria explained above were considered to be promoting environmental and social characteristics. In addition to this, the Investment Manager also considered that the following cases also complied with the environmental and social characteristics of the Sub-Fund, and they were accounted as such:

- Issuers that did not have an ESG rating or that did not meet the ESG indicators set out in the investment strategy, but

that had investments that may be considered sustainable investments, and in particular issuances that were classified as green, social or sustainable bonds, after prior validation by the Investment Manager, in accordance with its own analysis methodology.

- In the case of IIC, those that, although were not assigned an ESG rating by the Manager are IICs that promote ESG characteristics. (IIC considered Art. 8 Regulation (EU) 2019/2088 and/or targeting sustainable investments (Art. 9 in accordance with Regulation (EU) 2019/2088).

The above ESG criteria along with the compliance of the minimum commitments of the Sub-Fund were integrated into the investment process and monitored on a regular basis by the Investment Manager's Compliance team, and in the event of any non-compliance, the necessary corrective actions were taken (for instance, report to the management team, communication with the SRI team, referral to the relevant committee, among others).

In addition, the ESG performance of issuers has been subject to systematic and continuous monitoring by the Investment Manager's SRI team including continuous monitoring of potential discrepancies identified by portfolio managers between the knowledge of the issuer and the data considered within the model provided by suppliers.

At last, the Investment Manager has carried out engagement activities for private issuers and voting activities in cases where the type of asset allows it (shares). These activities were aligned with the social and environmental characteristics of the Sub-fund and with the Investment Manager's applicable Engagement and Voting Policies available at <https://www.santanderassetmanagement.lu/document-library/policies>. Further examples of the engagement and voting activities can be found in the Management Company's Stewardship Report available at: <https://www.santanderassetmanagement.com/sustainability>.

How did this financial product perform compared to the reference benchmark?

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
